## Independent Auditors' Report

To the Shareholders of The Bank of Nevis Limited

### Opinion

We have audited the consolidated financial statements of the Bank of Nevis Limited and its subsidiaries (the "Bank"), which comprise the consolidated statement of financial position as at June 30, 2019, consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Bank as at June 30, 2019, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

### Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

| Key audit matter                                 | Summary of the key audit matter  | Our audit response   |
|--|--|--|
| Estimated credit losses on financial instruments | <p>Effective July 1, 2018, the Group adopted IFRS 9 Financial Instruments. The mandatory implementation of IFRS 9 resulted in significant changes to management's recognition and measurement of impairment of its financial instruments.</p> <p>The Group opted to apply the modified retrospective transitional approach allowed by the Standard and did not restate the comparative figures but recorded all required adjustments at the date of initial adoption through retained earnings. Note 3.4.2.2 details management's methodology for recording expected credit losses on financial instruments.</p> | <ul style="list-style-type: none"> <li>Reviewed the Bank's process for determining ECLs.</li> <li>Tested the design and implementation of the key controls around the Bank's process to determine ECLs on financial instruments.</li> <li>Reviewed the Bank's accounting policy reclassifications of financial instruments to ensure that all financial instruments subject to the IFRS impairment model were appropriately classified.</li> <li>Obtained the Bank's IFRS 9 credit models/methodology papers and performed the following:                         <ul style="list-style-type: none"> <li>Evaluated judgements including definition of default and criteria for determination of significant increases in credit risk.</li> </ul> </li> </ul> |

## Independent Auditors' Report (Continued)

To the Shareholders of The Bank of Nevis Limited

| Key audit matter   | Summary of the key audit matter  | Our audit response   |
|--|--|--|
| <p>Estimated credit losses on financial instruments (cont'd)</p> | <p>The Group has recorded total expected credit losses (ECLs) of \$6,345,618 on the following financial instruments:</p> <ul style="list-style-type: none"> <li>• Balances due from banks and other financial institutions measured at amortised cost</li> <li>• Debt securities measured at amortised cost</li> <li>• Debt securities measured at fair value through other comprehensive income (FVTOCI)</li> <li>• Loans and advances and other receivables measured at amortised cost</li> </ul> <p>The Group presents balances due from banks and other financial institutions, debt securities carried at amortised cost and loans and advances and other receivables net of ECLs in the statement of financial position (SOFP). As at June 30, 2019, the gross carrying value of these financial assets was \$433,340,964 against which ECLs of \$6,287,336 was recognised. (refer to notes 7, 8 and 9)</p> <p>The expected credit losses for debt securities measured at FVTOCI is recognised in the revaluation reserve in equity with a corresponding charge to profit or loss. The accumulated loss recognised in other comprehensive income is recycled to profit or loss upon derecognition of the asset. The expected credit losses recorded for debt financial instruments recorded at FVTOCI is \$58,282. (refer to note 4).</p> <p>Estimating expected credit losses is a matter of key audit significance because of its materiality to the financial statements, modelling complexity and its use of significant management estimates and judgments. The Group has employed both qualitative and quantitative criteria to derive the key inputs/components included the calculation of the expected credit loss for the financial instruments.</p> <p>These factors are detailed within the accounting policy set out in note 3 to the consolidated financial statements. The measurement of the ECL is dependent on the Group's calculation of a Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD) and is based on current and forward-looking information for each individual exposure or collective segment. These three components are multiplied and discounted to determine the ECL for each category of financial instrument. We have therefore focused on the critical judgments and assumptions within each component that could give rise to material misstatements or are potentially subject to management bias.</p> | <ul style="list-style-type: none"> <li>- Evaluated the Bank's methodology for calculating probability of default (PD), loss given default (LGD), exposure at default (EAD) and discounting engines, including where necessary, consulting internal valuation specialists on the valuation methodology and assumptions.</li> <li>- Evaluated the Bank's approach to incorporating forward looking information in the estimate.</li> <li>- Critically challenged the key valuation assumptions and judgements, including assessing the sensitivity of the ECL to reasonable changes in the key assumptions and judgements.</li> <li>- Assessed the estimates for indication of possible fraudulent management bias.</li> <li>- Tested completeness and accuracy of data input to the model.</li> <li>• Obtained management's ECL computations and:             <ul style="list-style-type: none"> <li>- Tested mathematical accuracy of the calculations.</li> <li>- Tested the calculation of ECLs for a sample of financial instruments using the appropriate sampling methodology</li> <li>- Verified that the consistent application of the methodology throughout the calculations.</li> </ul> </li> <li>• Agreed the ECLs from the model to the underlying accounting records.</li> <li>• Assessed the appropriateness and completeness of the disclosures in accordance with IFRS.</li> </ul> |

## Independent Auditors' Report (Continued)

To the Shareholders of The Bank of Nevis Limited

### Other information

Management and those charged with governance are responsible for the other information. The other information comprises the information presented in The Bank of Nevis Limited's Annual Report (Annual Report) (but does not include the consolidated financial statements and summary non-consolidated financial statements and our auditors' reports thereon), which we obtained prior to the date of this auditors' report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If based on the work we have performed, on the other information that we obtained prior to the date of this auditors' report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

### Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

### Auditors' responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

## Independent Auditors' Report (Continued)

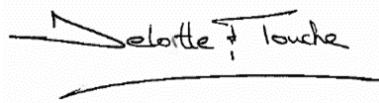

To the Shareholders of The Bank of Nevis Limited

### Auditor's responsibilities for the audit of the consolidated financial statements (cont'd)

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The engagement partner on the audit resulting in this independent auditors' report is Daryl Walcott-Grappie.

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

### **1 Incorporation and principal activities**

The Bank of Nevis Limited ("BON") is a public company incorporated on August 29, 1985 under the laws of the Federation of St. Christopher and Nevis. BON is subject to the provisions of the Banking Act No. 1 of 2015 of St. Christopher and Nevis and its principal activity is the provision of financial services. Its registered office is Main Street, Charlestown, Nevis.

In July 1998, BON's offshore activities and operations were transferred into a newly formed subsidiary company, Bank of Nevis International Limited which is licensed to carry on the business of International Banking as contemplated by the Nevis International Banking Ordinance of 2014.

On July 29, 2004 the Bank of Nevis International Fund Limited was incorporated. The Fund is an open-ended public mutual fund approved to be registered under the Nevis International Mutual Fund Ordinance, 2004. It commenced operations on February 9, 2005. The Fund ceased operations on January 31, 2008.

On July 29, 2004, the Bank of Nevis International Fund Managers Limited was incorporated in Nevis in accordance with the Nevis Business Corporation Ordinance, 1984 as amended and is a licensed and regulated investment manager under the Nevis International Mutual Fund Ordinance, 2004. The company is the investment manager for its related Fund – Bank of Nevis International Fund Limited, and manages the investment activities of the Fund when it was in operation.

On February 3, 2005, the Bank of Nevis Mutual Fund Limited was incorporated. The Fund is an open-ended public investment fund approved to be registered under the Securities Act 2001 of St. Christopher and Nevis. The Fund has not yet commenced its mutual fund activities.

On April 25, 2005, the Bank of Nevis Fund Managers Limited was incorporated under the laws of the Federation of St. Christopher and Nevis, through the Companies Ordinance 1999 of St. Christopher and Nevis. The company will be engaged to provide investment management service to its related Fund, Bank of Nevis Mutual Fund Limited, when the Fund commences its mutual fund activities.

On April 15, 2013 Bank of Nevis International Trust Services Inc. ("BONITS") was incorporated in accordance with the Companies Ordinance, Nevis, 1999 and licensed by the Minister of Finance pursuant to the Nevis Limited Liability Company Ordinance to be a registered agent. The company is engaged in trust services, registered agent and corporate services activities and is an authorised person to act as an agent for citizenship by investment applications. BON's shares are listed on the Eastern Caribbean Securities Exchange (ECSE).

### **2 Adoption and amendments of published accounting standards and interpretations**

#### **Standards, amendments and interpretations effective and adopted during the year**

Several new and revised accounting standards came into effect during the current period. The adoption of these new and revised accounting standards did not have a material impact on these consolidated financial statements, except as noted below:

- IFRS 9 – Financial Instruments (effective for annual periods beginning on or after January 1, 2018)

In July 2014, the IASB issued IFRS 9 Financial Instruments, the standard that replaced IAS 39 for annual periods on or after January 1, 2018, with early adoption permitted. The Bank did not early adopt IFRS 9. As permitted by the standard, the Bank elected not to restate comparative figures and any adjustments to the carrying amounts of financial assets and liabilities at the date of transition were recognised in Retained Earnings and other reserves of as at July 1, 2018 the date of initial adoption of the standard.

The adoption of IFRS 9 has resulted in changes in our accounting policies for recognition, classification and measurement of financial assets and liabilities and impairment of financial assets. In addition, the Bank has adopted consequential amendments to IFRS 7 Financial Instruments: Disclosures that are applied to disclosures for 2019, but have not been applied to the comparative information.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 2 Adoption and amendments of published accounting standards and interpretations

#### Standards, amendments and interpretations effective and adopted during the year (continued)

The key changes to the Bank's accounting policies resulting from the adoption of IFRS 9 are summarised below.

#### Changes to classification and measurement of financial assets and financial liabilities

IFRS 9 contains three principal classification categories for financial assets: measured at amortised cost, fair value through other comprehensive income and fair value through profit or loss. From a classification and measurement perspective, the new standard will require all financial assets, except equity instruments and derivatives, to be assessed based on a combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The standard eliminates the previous IAS 39 categories of held-to-maturity, available-for-sale and loans and receivables. IFRS 9 will also allow entities to continue to irrevocably designate instruments that qualify for amortised cost or fair value through OCI instruments as FVTPL, if doing so eliminates or significantly reduces a measurement or recognition inconsistency. Equity instruments that are not held for trading may be irrevocably designated as FVTOCI, with no subsequent reclassification of gains or losses to the income statement. The accounting for financial liabilities will largely be the same as the requirements of IAS 39.

#### Impairment of financial assets

The adoption of IFRS 9 has fundamentally changed the Bank's accounting for credit losses by replacing the "incurred loss" model under IAS 39 with a forward looking "expected credit loss" model. IFRS 9 requires the Bank to record an allowance for ECLs for all financial assets with credit risk exposure except those held at FVTPL, together with loan commitments and financial guarantee contracts. The allowance is based on the ECLs associated with the probability of default in the next twelve months unless there has been a significant increase in credit risk since origination, in which case it is based on the lifetime probability of default.

Details of the Bank's impairment method and the quantitative impact of applying IFRS 9 as at July 1, 2018 are disclosed in Note 3.

#### Transition

Changes in accounting policies resulting from the adoption of IFRS 9 have been applied retrospectively except as described below:

- Comparative periods have not been restated. Differences in carrying amounts of financial assets resulting from the adoption of IFRS 9 are recognised in retained earnings and reserves as at July 1, 2018. As such, the information presented for 2018 does not reflect the requirements of IFRS 9 and therefore is not comparable to the information presented for 2019 under IFRS 9.
- The following assessments have been made on the basis of the facts and circumstances that existed at the date of initial application – July 1, 2018
  - The determination of business model within which a financial asset is held
  - The designation and revocation of previous designations of certain financial assets.
  - The designation of certain investments in equity instruments not held for trading as at FVTOCI.
- IFRS 15 *Revenue from Contracts with Customers*

On July 1, 2018, the Bank adopted IFRS 15 *Revenue from Contracts with Customers* as issued in May 2014. IFRS 15 defines principles for recognising revenue and is applicable to all contracts with customers. However, interest integral to financial instruments and leases continues to fall outside the scope of IFRS 15 and is regulated by the other applicable standards (e.g., IFRS 9 Financial Instruments, and IFRS 16 Leases).

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 2 Adoption and amendments of published accounting standards and interpretations

#### Standards, amendments and interpretations effective and adopted during the year (continued)

Revenue under IFRS 15 must be recognised as goods and services are transferred, to the extent that the transferor anticipates entitlement to goods and services. The standard also specifies a comprehensive set of disclosure requirements regarding the nature, extent and timing as well as any uncertainty of revenue and corresponding cash flows with customers.

The adoption of IFRS 15 did not impact the timing or amount of fee and commission income from contracts with customers and the related assets and liabilities recognised by the Bank.

#### Standards and interpretations issued but not yet effective

The following new and revised accounting standards which are relevant to the Bank have been issued, but are not yet effective.

- *IFRIC 23, Uncertainty over Income Tax Treatments (effective from January 1, 2019)*

The interpretation provides clarification on the determination of taxable profit, tax bases, unused tax losses, unused tax credits, and tax rates when there is uncertainty over income tax treatments. The core principle of the interpretation requires the Bank to consider the probability of the tax treatment being accepted by the taxation authority. When it is probable that the tax treatment will be accepted, the determination of the taxable profit, tax bases, unused tax losses, unused tax credits, and tax rates shall be on the basis of the accepted tax treatment. Otherwise, the Bank has to use the most likely amount or the expected value, depending on the surrounding circumstances, in determining the tax accounts identified immediately above.

### 3. Significant accounting policies

#### 3.1 Statement of compliance

The consolidated financial statements have been prepared in accordance with IFRS as issued by the International Accounting Standards Board (IASB).

#### 3.2 Basis of preparation

Inter-company transactions, balances and intragroup gains on transactions between group companies are eliminated. Intragroup losses are also eliminated unless the transaction provides evidence of impairment of the asset transferred.

The integration of the subsidiaries into the consolidated financial statements is based on consistent accounting and valuation methods for similar transactions and other occurrences under similar circumstances.

#### 3.3 Foreign currency translation

##### *Functional and presentation currency*

Items included in the consolidated financial statements are measured using the currency of the primary economic environment in which the Bank operates (the "functional currency"). The consolidated financial statements are presented in Eastern Caribbean dollars, which is the Bank's functional and presentation currency.

##### *Transactions and balances*

Monetary assets and liabilities denominated in foreign currencies are translated into Eastern Caribbean dollars at the closing rates of exchange prevailing at the reporting date. Foreign currency transactions are translated at the rates prevailing on the transaction dates. Foreign exchange gains or losses arising from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of income.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 3. Significant accounting policies (continued)

#### 3.4 Financial assets

##### 3.4.1 Financial assets – Policies under IAS 39

The Bank classifies its financial assets into the following specified categories: 'loans and receivables' and 'available-for-sale'. Management determines the classification of its financial instruments at initial recognition.

###### (a) *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables including cash and balances due from banks and other financial institutions, loans and advances, investment securities (treasury bills, treasury notes and bonds) and other receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any impairment.

Interest income on loans and receivables is recognised by applying the effective interest rate, and is included in the consolidated statement of income.

###### (b) *Available-for-sale financial assets*

Available-for-sale instruments are non-derivative financial assets that are intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates or equity prices, or that are not classified as loans and receivables.

Available-for-sale financial assets are initially recognised at fair value, which is the cash consideration including any transaction costs, and measured subsequently at fair value. Changes in the carrying amount of available-for-sale financial assets relating to changes in foreign currency rates are recognised in profit or loss. Other changes in the carrying amount of available-for-sale financial assets are recognised in other comprehensive income and accumulated under the heading of 'revaluation reserves'. Where the financial asset is disposed of or determined to be impaired, the cumulative gain or loss previously accumulated in the revaluation reserve is reclassified to profit or loss.

Available-for-sale financial assets that do not have a quoted market price, and whose fair value cannot be reliably measured, are measured at cost less any impairment losses at the end of each reporting period.

Dividends on available-for-sale financial assets are recorded in the consolidated statement of income when the Bank's right to receive the dividends is established. Interest income on available-for-sale financial assets is calculated using the effective interest method, and recognised in the consolidated statement of income.

##### 3.4.1.1 Impairment of financial assets

At the end of each reporting period, the Bank's financial assets are assessed for indicators of impairment. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, the estimated future cash flows of the investment have been affected.

###### (a) *Assets classified as available-for-sale*

For available-for-sale equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, objective evidence of impairment could include:

1. significant financial difficulty of the issuer or counterparty; or
2. breach of contract, such as a default or delinquency in interest or principal payments; or
3. the Bank granting to the issuer or counterparty, for economic or legal reasons related to the issuer's/counterparty's financial difficulty, a concession that the Bank would not otherwise consider

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 3. Significant accounting policies (continued)

#### 3.4 Financial assets (continued)

##### 3.4.1.1 Impairment of financial assets (continued)

4. it becoming probable that the borrower will enter bankruptcy or financial re-organisation;
5. the disappearance of an active market for that financial asset because of financial difficulties.
6. Observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group including:
  - i. Adverse changes in the payment status of borrowers in the group
  - ii. National or local economic conditions that correlate with defaults on the assets in the group

When an available-for-sale financial asset is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss in the period.

In respect of available-for-sale equity securities, impairment losses previously recognised in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognised in other comprehensive income and accumulated under the heading of "revaluation reserves".

In respect of available-for-sale debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

##### (b) *Assets carried at amortised cost*

Loans and receivables are assessed on both individual and collective bases. Objective evidence of impairment of a portfolio of loans and receivable could include the Bank's past experience of payment within the portfolio, as well as observable changes in national or local economic conditions that correlate with defaults on loans and receivables.

If there is objective evidence that an impairment loss on an asset carried at amortised cost exists, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced through the use of a 'provision for loan loss' account and the amount of the loss is recognised in the consolidated statement of income. If an asset carried at amortised cost has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate determined under the contract. As a practical expedient, the Bank may measure impairment on the basis of an instrument's fair value using an observable market price. Statutory and other regulatory loan loss reserve requirements that exceed these amounts are recognised in other reserves as an appropriation of retained earnings.

The calculation of the present value of the estimated future cash flows of a collateralised financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised (such as an improvement in the debtor's credit rating), the previously recognised impairment loss is reversed by adjusting the allowance account. The amount of the reversal is recognised in the consolidated statement of income.

When a loan is uncollectible, it is written off against the related provision for loan losses. Such loans are written off after all of the available options have been exhausted, the necessary procedures have been completed and the amount of the loss has been determined. If in a subsequent period, amounts previously written off are recovered, the amounts collected are recognised in profit or loss through the 'bad debts recovered' account.

## Notes to Consolidated Financial Statements

### For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 3 Significant accounting policies (continued)

#### 3.4 Financial assets (continued)

##### 3.4.1.1 Impairment of financial assets (*continued*)

###### (c) *Renegotiated Loans*

Loans that are either subject to collective impairment assessment or individually significant and whose terms have been renegotiated are no longer considered to be past due, but are treated as new loans.

##### 3.4.1.2 Derecognition of financial assets

The Bank derecognises a financial asset only when the contractual rights to receive the cash flows from the assets expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Bank neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Bank recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Bank retains substantially all of the risks and rewards of ownership of a transferred financial asset, the Bank continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss.

On derecognition of a financial asset other than in its entirety (e.g. when the Bank retains an option to repurchase part of a transferred asset or retains a residual interest that does not result in the retention of substantially all the risks and rewards of ownership and the Bank retains control), the Bank allocates the previous carrying amount of the financial asset between the part it continues to recognise under the continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

##### 3.4.2 Financial assets – Policies under IFRS 9

The Bank has adopted IFRS 9 with a date of transition of July 1, 2018. The adoption of IFRS 9 has resulted in changes in accounting policies for classification, measurement and impairment of financial instruments. As permitted by IFRS 9, the Bank elected not to restate comparative figures. Any adjustments to the carrying amounts of financial assets at the date of transition were recognised in the opening retained earnings and other reserves at the date of transition on July 1, 2018.

###### 3.4.2.1 Classification and measurement

From July 1, 2018, the Bank has applied IFRS 9 and classifies its financial assets in the following measurement categories:

- Fair value through profit or loss (FVTPL);
- Fair value through other comprehensive income (FVTOCI); or
- Amortised cost.

### **3 Significant accounting policies (continued)**

#### **3.4 Financial assets (continued)**

##### **3.4.2.1 Classification and measurement (continued)**

###### (a) Debt instruments

Debt instruments are those instruments that contain contractual obligations to pay the instrument holder certain cash flows, such as government and corporate bonds. Loans and advances, due from banks and financial institutions and other receivables are classified as debt instruments as well.

Classification and subsequent measurement of debt instruments depend on:

- the Bank's business model for managing the asset; and
- the cash flow characteristics of the asset.

Business model test:

Business model reflects the objective of the Bank holding different assets. That is, whether the Bank's objective is solely to collect the contractual cash flows from the assets or is to collect both the contractual cash flows and cash flows arising from the sale of assets. If neither of these is applicable, the financial assets are held for trading purposes and are measured at FVTPL.

Solely Payments of Principal and Interest test (SPPI):

Where the business model is to hold assets to collect contractual cash flows or to collect contractual cash flows and sell, the Bank assesses whether the financial instruments' cash flows represent solely payments of principal and interest. In making this assessment, the Bank considers whether interest includes only consideration for the time value of money, credit risk, other basic lending risks and a profit margin that is consistent with a basic lending arrangement.

Based on these factors, the Bank classifies its debt instruments into one of the following three measurement categories:

- **Amortised cost:** Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest, and that are not designated at FVTPL, are measured at amortised cost. The carrying amount of these assets is adjusted by any expected credit loss allowance recognised.
- **FVTOCI:** Financial assets that are held for collection of contractual cash flows and for selling the assets, where the assets' cash flows represent solely payments of principal and interest, and that are not designated at FVTPL, are measured at FVTOCI. Movements in the carrying amount are taken through other comprehensive income, except for the recognition of impairment gains or losses, interest revenue and foreign exchange gains and losses, which are recognised in profit or loss.
- **FVTPL:** Assets that do not meet the criteria for amortised cost or FVTOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL is recognised in profit or loss.

The Bank reclassifies debt investments when and only when its business model for managing those assets changes. The reclassification takes place from the start of the first reporting period following the change. Such changes are expected to be infrequent and none occurred during the period.

### 3 Significant accounting policies (continued)

#### 3.4 Financial assets (continued)

##### 3.4.2 Financial assets – Policies under IFRS 9 (continued)

###### 3.4.2.1 Classification and measurement (continued)

###### (b) Equity instruments

Equity instruments are instruments that do not contain contractual obligations to pay the instrument holder and that evidence residual interests in the issuer's net assets. The Bank subsequently measures equity investments with the exception of local equity investments at FVTPL. Local equity investments are measured at FVTOCI. The fair value of FVTOCI that are not quoted securities is derived by the use of valuation techniques.

The Bank has used valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. Based on information available the Bank has utilised the adjusted net asset method approach to measuring the fair value of unquoted equity instruments. The adjusted net asset method involves deriving the fair value of an investee's equity instruments by reference to the fair value of its assets and liabilities. As part of the valuation process reference is made to individual assets and liabilities recognised in the investee's statement of financial position as well as the fair value of any unrecognised assets and liabilities at the measurement date. The Bank also evaluates the measurement method that the investees use to measure its assets and liabilities and applies judgement in adjusting the carrying amounts to fair value.

Local equity investments have not historically or is presently traded by the Bank. These securities are held for capital appreciation purposes and the receipt of dividend income. Impairment losses are not reported separately from other changes in fair value. Dividends, when representing a return on such investments, continue to be recognised in profit or loss as other income when the Bank's right to receive payments is established.

###### 3.4.2.2 Impairment measurement

IFRS 9 outlines a 'three-stage' model for impairment based on changes in credit quality since initial recognition as summarised below:

- A financial instrument that is not credit-impaired on initial recognition is classified in 'Stage 1'. Financial instruments in Stage 1 have their ECL measured at an amount equal to the portion of lifetime expected credit losses that result from default events possible within the next 12 months.
- If a significant increase in credit risk ('SICR') since initial recognition is identified, the financial instrument is moved to 'Stage 2' but is not yet deemed to be credit-impaired. Instruments in Stage 2 have their ECL measured based on expected credit losses that result from default events over the lifetime of the instrument.
- If the financial instrument is credit-impaired, the financial instrument is then moved to 'Stage 3'. Instruments in Stage 3 have their ECL measured based on expected credit losses that result from default events over the life of the instrument.
- Purchased or originated credit-impaired financial assets are those financial assets that are credit-impaired on initial recognition. Cumulative changes in lifetime expected credit losses are recognised since initial recognition. At each reporting date, the amount of the change in lifetime expected credit losses is recognised as an impairment gain or loss. Their ECL is always measured on a lifetime basis.

### 3 Significant accounting policies (continued)

#### 3.4 Financial assets (continued)

##### 3.4.2 Financial assets – Policies under IFRS 9 (continued)

##### 3.4.2.2 Impairment measurement (continued)

For debt securities, the Bank examines the issuer's capital adequacy, financial performance, liquidity position, and credit rating to assess whether the issuer has experience significant increase in credit risk since the origination of the assets. When no external credit rating is available, the Bank assigns internal credit rating based on internal risk criteria. The Bank also considers if there is any negative press or adverse market information that may indicate changes in credit risk.

For loans and advances, and other receivables delinquency status is utilised as the main indicator for changes in credit risk. Credit management actions are triggered by movement in days past due. Other qualitative factors are also considered, which include but are not limited to:

- Early signs of cash flow / liquidity problems
- The borrower is in short-term forbearance
- Known adverse change in financial conditions
- Known adverse changes in business or economic conditions in which the borrower operates

For debt securities, default is defined as the missed of contractual payment of principal or interest. For loans and advances, and other receivables, the Bank defines default based on the following criteria:

##### Quantitative criteria

- The borrower is more than 90 days past due on its contractual payments

##### Qualitative criteria

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. Examples of these instances are:

- The borrower is in long-term forbearance
- The borrower is deceased
- The borrower is insolvent
- The borrower is in breach of financial covenants

The criteria above are consistent with the definition of default used for internal credit risk management purposes.

The Bank assesses on a forward-looking basis the expected credit losses ('ECL') associated with its debt instrument carried at amortised cost and FVTOCI and with the exposure arising from loan commitments. The Bank recognises a loss allowance for such losses at each reporting date. The measurement of ECL reflects:

- An unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;
- The time value of money; and
- Reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The estimation of credit exposure for risk management purposes is complex and requires the use of models, as the exposure varies with changes in market conditions, expected cash flows and the passage of time. The Bank measures credit risk using Probability of Default (PD), Exposure at Default (EAD) and Loss Given Default (LGD).

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

### **3 Significant accounting policies (continued)**

#### **3.4 Financial assets (continued)**

##### **3.4.2 Financial assets – Policies under IFRS 9 (continued)**

###### **3.4.2.2 Impairment measurement (continued)**

PD represents the likelihood of a borrower defaulting on its financial obligation either over the next 12 months (12M PD), or over the remaining lifetime (Lifetime PD) of the obligation. PD is generated based on historical default data of each portfolio.

EAD is based on the amounts the Bank expects to be owed at the time of default, over the next 12 months (12M EAD) or over the remaining lifetime (Lifetime EAD). EAD is assessed based on contractual terms of the debt instrument.

LGD represents the Bank's expectation of the extent of loss on a defaulted exposure. LGD varies by type of counterparty, availability of collateral or other credit support, and historical recovery information.

ECL is determined by projecting the PD, LGD and EAD for future periods and is based on current and forward looking information for each individual exposure or collective segment. These three components are multiplied together and discounted. For expected credit loss provisions modelled on a collective basis, a group of exposures is assessed on the basis of shared risk characteristics, such that risk exposures within a group are homogeneous.

A loss allowance for full lifetime ECL is required for a financial instrument if the credit risk on that financial instrument has increased significantly since initial recognition and financial instruments in default. For all other financial instruments, ECLs are measured at an amount equal to the 12-month ECL.

###### **Significant increase in credit risk**

When determining whether the risk of default on a financial instrument has increased significantly since initial recognition, the Bank considers both quantitative and qualitative information and analysis based on the Bank's historical experience and credit risk assessment. The Bank considers as a backstop that significant increase in credit risk occurs when an asset is more than 31 days past due.

An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed significant increase in credit risk since origination, then the expected credit losses reverse from lifetime ECL to 12-months ECL.

###### **Forward-looking information**

When incorporating forward looking information, such as macroeconomic forecasts, into determination of expected credit losses, the Bank considers the relevance of the information for each specific group of financial instruments. The macroeconomic indicators utilised include but are not limited to GDP growth and unemployment rate. These variables and their associated impact on the ECL varies by financial instrument.

In addition to the base economic scenario, the Bank also incorporated upside and downside scenarios along with scenario weightings. The number of other scenarios used is set based on the analysis of each product type to ensure non-linearities are captured. The attributes of scenarios are reassessed at each reporting date. The scenario weightings takes account of the range of possible outcomes each chosen scenario is representative of.

#### 3.4 Financial assets (continued)

##### 3.4.2 Financial assets – Policies under IFRS 9 (continued)

##### 3.4.2.2 Impairment measurement (continued)

###### Presentation of ECLs

ECLs are presented in the statement of financial position as follows:

- Financial assets measured at amortised cost: as a deduction from the gross carrying amount of the assets;
- Debt instruments measured at fair value through OCI the ECLs are not recognised in the Statement of Financial Position because the carrying amounts of these assets remain their fair values. However, the loss allowance is disclosed and is recognised in the fair value reserve in equity with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is recycled to profit or loss upon derecognition of the assets.; and
- Loan commitments as a provision.

##### 3.4.3 Reconciliation of statement of financial position balances from IAS 39 to IFRS 9

The measurement category and the carrying amount of financial assets in accordance with IAS 39 and IFRS 9 at July 1, 2018 are compared as follows:

|  | <b>IAS 39<br/>classification</b> | <b>Carrying value<br/>June 30, 2018<br/>\$</b> | <b>IFRS 9<br/>classification</b> | <b>Carrying value<br/>July 1, 2018<br/>\$</b> |

#### 3.5 Financial liabilities and equity instruments

Debt and equity instruments issued by the Bank are classified as either financial liabilities or as equity in accordance with the substance of the contractual agreements and the definitions of financial liability and an equity instrument.

##### 3.5.1 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Bank are recognised at the proceeds received, net of direct issue costs.

###### 3.5.1.1 Ordinary shares

Ordinary shares are classified in the financial statements as equity.

###### 3.5.1.2 Dividends on ordinary shares

Dividends on ordinary shares are recognised in equity in the period in which they are approved by the Bank's shareholders. Dividends for the year which are approved after the date of the consolidated statement of financial position are disclosed in the notes to the financial statements.

##### 3.5.2 Other financial liabilities

Financial liabilities are classified as 'other financial liabilities', and are initially recognised at cost. Other financial liabilities (including customers' deposits and amounts due from subsidiaries) are subsequently recognised at amortised cost using the effective interest method.

##### 3.5.3 Derecognition of financial liabilities

The Bank derecognises financial liabilities when, and only when, the Bank's obligations are discharged or cancelled, or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

### 3 Significant accounting policies (continued)

#### 3.6 Interest income and expense

Interest income and expenses are recognised in the consolidated statement of income for all interest bearing financial assets and liabilities using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or liability on initial recognition. The calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs and all other premiums or discounts.

Once a financial asset or a group of similar financial assets has been written down as a result of an impairment loss, interest income is recognised using the rate of interest to discount the future cash flows for the purpose of measuring the impairment loss.

#### 3.7 Fees and commissions

Fees and commissions are generally recognised on an accrual basis when the service has been provided. Loan commitment fees for loans which are likely to be drawn down, are deferred (together with related direct costs) and recognised as an adjustment to the effective yield on the loan.

Commission and fees arising from negotiating or participating in the negotiation of a transaction for a third party, such as the acquisition of shares or other securities are recognised on completion of the underlying transaction.

#### 3.8 Dividend income

Dividend income from investment securities is recognised in the consolidated statement of income when the Bank's right to receive the payment has been established (provided that it is probable that the economic benefits will flow to the Bank and the amount of income can be measured reliably).

#### 3.9 Property, plant and equipment and depreciation

Land and buildings held for use in the production or supply of services, or administrative purposes are stated in the consolidated statement of financial position at their revalued amounts, being the fair value at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from those that would be determined using fair values at the end of each reporting period.

Any revaluation increase arising on the revaluation of such land and buildings is recognised in other comprehensive income and accumulated in equity, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. A decrease in the carrying amount arising on the revaluation of such land and buildings is recognised in profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.

Depreciation on revalued buildings is recognised in profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees, and for qualifying assets, borrowing costs capitalised in accordance with the Bank's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 3 Significant accounting policies (continued)

#### 3.9 Property, plant and equipment and depreciation (continued)

Furniture, fixtures, vehicles and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets (other than land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis. The following annual depreciation rates are applied:

|                        |      |
|------------------------|------|
| Buildings              | 2.5% |
| Furniture and fixtures | 15%  |
| Equipment              | 15%  |
| Computer equipment     | 20%  |
| Land improvement       | 10%  |

Land is not depreciated.

All repairs and maintenance to property, plant and equipment are charged to operating expenses during the financial period in which they are incurred.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

#### 3.10 Intangible assets – computer software

Acquired computer software is carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over the estimated useful lives of the computer software, which is three to five years, using the straight line method. The estimated useful lives and method of amortisation are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Costs associated with maintaining computer software programs are charged to operating expenses during the financial period in which they are incurred.

#### 3.11 Impairment of property, plant, equipment and intangible assets

Property, plant, equipment and intangible assets are periodically reviewed for impairment. An impairment loss is recognised for the amount by which the carrying amount of the asset is greater than its estimated recoverable amount. The recoverable amount of an asset is the higher of fair value less costs to sell, and value in use.

#### 3.12 Provisions

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events, it is probable that the Bank will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 3 Significant accounting policies (continued)

#### 3.13 Cash and cash equivalents

Cash and cash equivalents comprise balances with less than three months' maturity from the date of acquisition. These include cash, unrestricted balances with banks and other financial institutions, treasury bills, and other short term highly liquid investment securities.

#### 3.14 Pension costs

The Bank maintains a defined contribution pension plan for its eligible employees.

The Bank's contributions to the defined contribution pension plan are charged to the consolidated statement of income in the period to which the contributions relate.

#### 3.15 Taxation

##### a) *Current income tax*

Income tax receivable/payable is calculated on taxable profit for the year, based on the enacted tax rates within the Federation of St. Christopher and Nevis. Taxable profit differs from net profit as reported in the consolidated statement of income because of items of income or expense that are taxable or deductible in other years and items that are not taxable or deductible.

##### b) *Deferred income tax*

Deferred income tax is recognised on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Deferred income tax is determined using the enacted tax rates by the date of the consolidated statement of financial position and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

The principal temporary differences arise from the depreciation of plant and equipment and the revaluation of certain financial assets and liabilities.

Income tax payable on profits, based on the applicable tax law is recognised as an expense in the period in which profits arise. Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

#### 3.16 Non-current assets held for sale

Assets and liabilities of disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. Non-current asset (or disposal group) classified as held for sale is measured at the lower of its carrying amount and fair value less costs to sell. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

An extension of the one year condition to sell a disposal group is allowable when a delay is caused by events outside the owner's control and the commitment to the plan to sell the non-current asset or disposal group can be substantiated.

Non-current assets of the subsidiary, Bank of Nevis International Limited currently classified as held for sale has extended beyond the one year time-frame from initial classification. Management has determined that the classification remains relevant because the disposal of majority interest in the subsidiary could not have occurred until approval by the Regulator of the subsidiary to transfer the majority shares to the investor was granted. Approval was granted on July 28, 2017.

At an Extraordinary General Meeting of The Bank of Nevis Limited (the Bank) held on Wednesday December 20<sup>th</sup>, 2017, the shareholders of the Bank resolved that the Directors be authorised to dispose of the Company's interest in Bank of Nevis International Limited (BONI) by way of the sale of an additional 15% shares in BONI with authorization to dispose of the remaining shareholdings in BONI, such authority being granted up to December 31, 2018.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

### 3 Significant accounting policies (continued)

#### 3.16 Non-current assets held for sale (continued)

On November 26<sup>th</sup>, 2018, the Bank entered into an agreement with Petrodel Investment Advisers (Nevis) Limited for the sale of the remaining 40% shares in BONI with a completion date of June 30<sup>th</sup>, 2019. This was subject to the approval of the Regulator of International Banking. On April 9<sup>th</sup>, 2019, the Regulator confirmed approval for the sale and it is expected that the sale of majority interest in the subsidiary will be completed before June 30, 2020.

When the Bank is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Bank will retain a non-controlling interest in its former subsidiary after the sale.

When the Bank is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate or joint venture, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and the Bank discontinues the use of the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate or a joint venture that has not been classified as held for sale continues to be accounted for using the equity method. The Bank discontinues the use of the equity method at the time of disposal when the disposal results in the Bank losing significant influence over the associate or joint venture.

### 4 Financial risk management

The Bank's business involves taking on risks in a targeted manner and managing them professionally. The core functions of the Bank's risk management are to identify all key risks for the Bank, measure these risks, manage the risk positions and determine capital allocations. The Bank regularly reviews its risk management policies and systems to reflect changes in markets, products and best market practice.

The Bank's aim is to achieve an appropriate balance between risk and return and minimise potential adverse effects on the Bank's financial performance.

The Bank defines risk as the possibility of losses of profits foregone, which may be caused by internal or external factors.

Risk management is carried out by the Accounting and Investment and Risk and Compliance departments under policies approved by the Board of Directors. A risk management committee is also established to oversee the risk management process of the Bank. The Accounting and Investment department identifies, evaluates and hedges financial risks in close co-operation with the Bank's operating units. The Board and risk management committee provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of non-derivative financial instruments. In addition, internal audit is responsible for the independent review of risk management and the control environment. The risks arising from financial instruments to which the Bank is exposed are financial risks, which include credit risk, liquidity risk, market risks (which are discussed below) and operational risk.

#### 4.1 Credit risk

Credit risk is the risk of suffering financial loss, should any of the Bank's customers, clients or market counterparties fail to fulfil their contractual obligations to the Bank. Credit risk arises mainly from commercial and consumer loans and advances, credit cards, and loan commitments arising from such lending activities, but can also arise from credit enhancement provided, financial guarantees, letters of credit, endorsements and acceptances.

The Bank is also exposed to other credit risks arising from investments in debt securities and other exposures arising from its trading activities ('trading exposures'), including non-equity trading portfolio assets, and settlement balances with market counterparties.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

### For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

#### **4 Financial risk management (continued)**

##### **4.1 Credit risk (continued)**

Credit risk is the single largest risk for the Bank's business; management therefore carefully manages its exposure to credit risk. The credit risk management and control are conducted by management of the Credit and Accounting and Investments departments and Internal Management Investment Committee which reports to the investment and credit committees and Board of Directors regularly.

Oversight of credit risk is delegated by the Board of Directors to the Credit Committee.

The Bank's credit committee exercises oversight of the the Bank's credit risk by:

- Ensuring that the Bank has appropriate credit risk practices, including an effective system of internal control, to consistently determine adequate allowances in accordance with the Bank's stated policies and procedures, IFRS and relevant supervisory guidance.
- Identifying, assessing and measuring credit risk across the Bank, from an individual instrument to a portfolio level.
- Creating credit policies to protect the Bank against the identified risks including the requirements to obtain collateral from borrowers, to perform robust ongoing credit assessment of borrowers and to continually monitor exposures against internal risk limits.
- Limiting concentrations of exposure by type of asset, counterparties, industry, credit rating, geographic location etc.
- Establishing a robust control framework regarding the authorisation structure for the approval and renewal of credit facilities.
- Developing and maintaining the Bank's risk grading to categorise exposures according to the degree of risk of default. Risk grades are subject to regular reviews.
- Developing and maintaining the Bank's processes for measuring ECL including monitoring of credit risk, incorporation of forward-looking information and the method used to measure ECL.
- Ensuring that the Bank has policies and procedures in place to appropriately maintain and validate models used to assess and measure ECL.
- Establishing a sound credit risk accounting assessment and measurement process that provides it with a strong basis for common systems, tools and data to assess credit risk and to account for ECL. Providing advice, guidance and specialist skills to business units to promote best practice throughout the Bank in the management of credit risk.

The internal audit function performs regular audits making sure that the established controls and procedures are adequately designed, implemented and operating effectively.

##### **4.1.1 Credit risk management**

###### *(a) Loans and advances*

The estimation of credit loss is complex and requires the use of models, as the value of a product varies with changes in market variables, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties as outlined in 3.4.2.3 impairment measurement above. The Bank currently uses status of delinquency and days past due together with any qualitative factors. The approaches used are varied using probability of default, exposure at default and loss given default or a loss rate approach.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 4 Financial risk management (continued)

#### 4.1 Credit risk (continued)

##### 4.1.1 Credit risk management (continued)

###### *(b) Debt securities and other bills*

The Bank's portfolio of debt securities and other bills consists of St Christopher and Nevis Federal Government, Nevis Island Administration, and Governments of Antigua and Barbuda, Grenada, Dominica, Nevis Island Administration, and Governments of Antigua and Barbuda, Grenada, Dominica, St. Lucia and St. Vincent and the Grenadines treasury bills, and other debt obligations by regional governments and banking and non banking financial institutions, are all measure using either the Bank's internal rating system that incorporates macroeconomic factors or external ratings obtained from regional rating agencies. The Bank assesses the risk of default on these obligations by regularly monitoring the performance of the St. Kitts and Nevis Federal Government, the Nevis Island Administration and other regional governments through published government data, information received directly from government departments and information published by international agencies such as the International Monetary Fund (IMF) and the World Bank.

The risk of default on regional corporate debt is assessed by continuous monitoring of the performance of these companies through published financial information, and other data gleaned from various sources.

##### 4.1.2 Risk limit control and mitigation policies

The Bank manages limits and controls concentrations of credit risk wherever they are identified, in particular to individual counterparties and groups, and to industries and countries.

The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and industry segments. Such risks are monitored on a revolving basis and subject to regular review by the Board of Directors.

The exposure to any one borrower, including banks and brokers is further restricted by sub-limits covering on- and off-balance sheet exposures, and daily delivery risk limits in relation to trading items. Actual exposures against limits are monitored, on an ongoing basis.

Lending limits are reviewed in light of changing market and economic conditions and periodic credit reviews and assessments of probability of default.

Some other specific control and mitigation measures are outlined below:

###### *(a) Collateral*

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is a common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances are as follows:

- Mortgages over properties;
- Charges over business assets such as premises, inventory and accounts receivable; and
- Charges over financial instruments such as debt securities and equities.

Longer-term finance and lending to corporate entities as well as individual credit facilities are generally secured.

Collateral held as security for financial assets other than loans and advances is determined by the nature of the instrument. Debt securities, treasury and other eligible bills are generally unsecured.

###### *(b) Credit-related commitments*

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit carry the same credit risk as loans. Documentary and commercial letters of credit which are written undertakings by the Bank on behalf of a customer authorising a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions are collateralised by the underlying shipment of goods to which they relate, and therefore carry less risk than a direct loan.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.1 Credit risk (continued)

##### 4.1.2 Risk limit control and mitigation policies (continued)

Commitments to extend credit represent unused portions of authorisations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments, as most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Bank monitors the term to maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter term commitments.

##### 4.1.3 Maximum exposure to credit risk before collateral held or other credit enhancements

|   | 2019               | 2018        |

| – FVTOCI investments, quoted                                      |                    |             |
| Loans and advances  | <b>261,031,476</b> | 242,895,910 |
| Other assets  | <b>199,421</b>     | 141,468     |
|   | <b>427,253,049</b> | 392,688,847 |
| <b>Credit risk exposures relating to off-balance sheet items:</b> |                    |             |
| Loan commitments and other credit related facilities              | <b>17,656,688</b>  | 21,324,588  |
| <b>Total</b>  | <b>444,909,737</b> | 414,013,435 |

The above table represents a worst case scenario of credit risk exposure to the Bank at June 30, 2019 and 2018, without taking account of any collateral held or other credit enhancements attached. For on-statement of financial position assets, the exposures set out above are based on net carrying amounts as reported in the consolidated statement of financial position.

As shown above, 58.7 % of the total maximum exposure is derived from loans and advances to customers (2018: 63.2%); 16.4% from investment securities (2018: 18.9%).

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.1 Credit risk (continued)

##### 4.1.3 Maximum exposure to credit risk before collateral held or other credit enhancements (continued)

Management is confident in its ability to continue to control and sustain minimal exposure of credit risk to the Bank resulting from both its loans and advances portfolio and debt securities based on the following:

- 86.59% of the loans and advances portfolio exposure is categorised as performing (2018: 87.1%);
- 13% of loans and advances are considered impaired (2018: 12.5%);
- The provision for impairment is \$6,152,589 million (2018: \$6,060,583 million);
- Treasury bills are held with the Nevis Island Administration, the St. Christopher and Nevis Federal Government, the Government Antigua and Barbuda, the Government of St. Vincent and the Government of St. Lucia;
- The debt investment securities in the Bank's investment portfolio apart from the Treasury Bills are held with non-bank financial institutions in the Eastern Caribbean region, which have a relatively low risk profile.

##### *Loans and advances renegotiated*

Restructuring activities include extended payment arrangements, approved external management plans, modification and deferred payments. Following restructuring, a previously overdue account is reset to a normal status and managed together with other similar accounts. Restructuring policies and practices are based on indicators of criteria which, in the judgement of management, indicate that payment will most likely continue. These policies are kept under continuous review. Restructuring is most commonly applied to term loans, in particular customer finance loans. Renegotiated loans that would otherwise be past due or impaired totalled \$584,705 at June 30, 2019 (2018: \$437,657).

#### 4.1.4 Credit quality of loans and advances

##### Significant increase in credit risk

As discussed above in the significant increase in credit risk section, under the Bank's monitoring procedures a significant increase in credit risk is identified before the exposure has defaulted, and at the latest when the exposure becomes 31 days past due. The table below provide an analysis of the gross carrying amount of loans and advances to customers by past due status excluding related interest receivable.

|  | Year ended 2019       |                  | Year ended 2018       |                  |

##### 4.1.5 Repossessed collateral

During the year ended June 30, 2019, the Bank took possession of collateral securing facilities with carrying value of \$Nil (2018: \$Nil).

Repossessed properties are sold as soon as practicable, with the proceeds used to reduce the outstanding indebtedness.

#### Write-off

Loans and debt securities are written off when the Bank has no reasonable expectations of recovering the financial asset (either in its entirety or a portion of it). This is the case when the Bank determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. Recoveries resulting from the Group's enforcement activities will result in impairment gains.

This table summarises the loss allowance as of the year end by class of exposure/asset.

#### Loss allowance by class

|   | 2019             | 2018             |
|---|------------------|------------------|
| Debt securities - Amortised cost          | 134,747          | -                |
| Debt securities - FVTOCI                  | 58,282           | -                |
| Equity securities - FVTOCI                | -                | -                |
| Equity securities - Available-for-sale    | -                | 1,347,450        |
| Loans and advances, and other receivables | 6,152,589        | 6,060,583        |
|   | <u>6,345,618</u> | <u>7,408,033</u> |

Changes in the gross carrying amount of financial instruments that contributed to the changes in the loss allowance include:

- Changes because financial instruments originated or acquired during the reporting period;
- Changes because the financial instruments that were derecognised (including those that were written-off) during the reporting period; and
- Changes arising from whether the loss allowance is measured at an amount equal to 12-month or lifetime expected credit losses.

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.1 Credit risk (continued)

##### 4.1.7 Concentration of risks of financial assets with credit risk exposure (continued)

The following table contains an analysis of the credit risk exposure of financial instruments for which an ECL allowance is recognised. The net carrying amount of financial assets below also represents the Bank's maximum exposure to credit risk on these assets.

| Debt securities –<br>amortised cost | 2019                       |                             |                             |                                  | 2018        |             |

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.1 Credit risk (continued)

##### 4.1.7 Concentration of risks of financial assets with credit risk exposure (continued)

Loss allowances

The allowance for ECL is recognised in each reporting period and is impacted by a variety of factors, as described below:

- Transfers between stages due to financial assets experiencing significant movement in credit risk or becoming credit-impaired during the period;
- Additional allowances for new financial instruments recognised during the period, as well as releases for financial instruments de-recognised in the period;
- Impact on the measurement of ECL due to inputs used in the calculation including the movement between 12-month and life-time ECL;
- Impacts on the measurement of ECL due to changes made to models and model assumptions; and
- Foreign exchange retractions for assets denominated in foreign currencies.

The following tables explain the changes in the loss allowance between the beginning and the end of the annual period due to these factors:

|   | <b>Stage 1<br/>12-month<br/>ECL</b> | <b>Stage 2<br/>Lifetime<br/>ECL</b> | <b>Stage 3<br/>Lifetime<br/>ECL</b> | <b>Purchased<br/>credit-<br/>impaired</b> | <b>Total</b> |
|---|-------------------------------------|-------------------------------------|-------------------------------------|---|--------------|
|   | \$                                  | \$                                  | \$                                  | \$  | \$           |
| <b>Debt securities – amortised cost</b>               |                                     |                                     |                                     |   |              |

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.1 Credit risk (continued)

##### 4.1.7 Concentration of risks of financial assets with credit risk exposure (continued)

The most significant period-end assumptions used for the ECL estimate as at June 30, 2019 are set out below.

|                                     |          | 2020   | 2021   |
|-------------------------------------|----------|--------|--------|
| World GDP growth rate               | Base     | 3.5%   | 3.6%   |
|                                     | Upside   | 4.7%   | 4.8%   |
|                                     | Downside | 2.2%   | 2.4%   |
| US unemployment rate                | Base     | 2.2%   | 1.8%   |
|                                     | Upside   | 3.8%   | 3.5%   |
|                                     | Downside | 0.5%   | 0.2%   |
| US inflation rate                   | Base     | 2.0%   | 2.1%   |
|                                     | Upside   | 2.9%   | 3.1%   |
|                                     | Downside | 1.0%   | 1.1%   |
| St. Kitts and Nevis GDP growth rate | Base     | 2.8%   | 2.8%   |
|                                     | Upside   | 6.7%   | 6.7%   |
|                                     | Downside | (1.1)% | (1.1)% |
| St. Lucia GDP growth rate           | Base     | 2.8%   | 2.8%   |
|                                     | Upside   | 7.0%   | 7.0%   |
|                                     | Downside | (1.5)% | (1.5)% |

The scenario weightings assigned to each economic scenario at July 01, 2018 were as follows:

|  | Base | Upside | Downside |
|--|------|--------|----------|
| Debt securities                              | 80%  | 10%    | 10%      |
| Loans and advances,<br>and other receivables | 80%  | 10%    | 10%      |

The scenario weightings assigned to each economic scenario at June 30, 2019 were as follows:

|  | Base | Upside | Downside |
|--|------|--------|----------|
| Debt securities                              | 80%  | 10%    | 10%      |
| Loans and advances,<br>and other receivables | 80%  | 10%    | 10%      |

Set out below are the changes to the ECL as at June 30, 2019 that would result from reasonably possible variations in the most significant assumption affecting the ECL allowance:

| Loss Given Default            | Change in threshold | ECL impact of     |                   |
|-------------------------------|---------------------|-------------------|-------------------|
|                               |                     | Increase in value | Decrease in value |

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.2 Market risk

The Bank takes on exposure to market risk, which is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements and changes in the level of volatility of market rates or prices such as interest rates, credit spreads, foreign exchange rates and equity prices. The Bank separates exposures to market risk into either trading or non-trading portfolios.

The market risks arising from trading and non-trading portfolios are monitored by the Risk Management Committee, Investment and Internal Management Investment Committee and by management. Regular reports are submitted to the Board of Directors and department heads.

##### 4.2.1 Price risk

The Bank is exposed to equity securities price risk because of equity investments held by the Bank and classified in the consolidated statement of financial position as available-for-sale. The Bank's portfolio includes securities that are quoted on the Eastern Caribbean Securities Exchange (ECSE) in addition to mutual funds that are quoted in the United States. Its exposure to equity securities price risk in respect of ECSE traded securities is minimal because the total of these securities is insignificant in relation to its consolidated statement of financial position and because of the limited volatility in this market. The mutual funds' exposure to equity securities price risk is managed by setting maximum exposure limits and the close monitoring of these securities. The Bank is not exposed to commodity price risk.

If market rates at June 30, 2019 had been 0.5% higher/lower with all other variables held constant, equity for the year would have been \$29,729 (2018: \$7,115) lower/ higher as a result of the increase/decrease in the fair value of available-for-sale investment securities.

##### 4.2.2 Foreign exchange risk

The Bank takes on exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. The Board sets limits on the level of exposure by currency and in aggregate for both overnight and intra-day positions, which are monitored daily.

Most of the Bank's assets and liabilities in foreign currencies are held in United States dollars. The exchange rate of the Eastern Caribbean dollar (XCD\$) to the United States dollar (US\$) has been formally pegged at XCD\$2.7 = US\$1.00 since 1974.

The following table summarises the Bank's exposure to foreign currency risk at June 30, 2019. Included in the table are the Bank's financial instruments at carrying amounts, categorised by currency.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

### For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

#### **4 Financial risk management (continued)**

##### **4.2 Market risk (continued)**

##### **4.2.2 Foreign currency risk (continued)**

If at June 30, 2019, the Eastern Caribbean dollar had weakened /strengthened by 10% against the Euro with all other variables held constant, post-tax profit for the year would have been \$340,509 (2018: \$107,921) higher/lower, mainly as a result of foreign exchange gains/losses on translation of Euro denominated loans and receivables and foreign exchange losses/gains on translation of customer deposits denominated in Euro.

The contribution to profit before taxation of foreign exchange gains/losses on assets and liabilities held in Euro currency in 2019 was a loss of \$40,146 (2018: gain of \$119,910).

The Bank holds no Euro denominated investment securities. Hence, there would have been no impact on equity if the Eastern Caribbean Dollar had weakened/strengthened against the Euro at June 30, 2019.

If at June 30, 2019, the Eastern Caribbean dollar had weakened/strengthened by 10% against the Pound Sterling with all other variables held constant, post-tax profit for the year would have been \$18,360 (2018: \$51,260) higher/lower, mainly as a result of foreign exchange gains/losses on translation of Pound Sterling denominated loans and receivables, and foreign exchange losses/gains on translation of customer deposits denominated in Pounds Sterling.

The contribution of profit before taxation of foreign exchange gains/losses is on assets and liabilities held in Pound Sterling in 2019 was a loss of \$23,044 (2018: loss of \$113,037).

Because the Bank holds no Pound Sterling denominated investment securities, there would have been no impact on equity, if the Eastern Caribbean dollar had weakened/strengthened against the Pound Sterling at June 30, 2019.

If at June 30, 2019, the Eastern Caribbean dollar had weakened /strengthened by 10% against the Canadian dollar with all other variables held constant, post-tax profit for the year would have been \$72,638 (2018: \$75,858) higher/lower, mainly as a result of foreign exchange gains/losses on translation of Canadian dollar denominated loans and receivables and foreign exchange losses/gains on translation of customer deposits denominated in Canadian dollars.

The contribution to profit before taxation of foreign exchange gains on assets and liabilities held in Canadian currency in 2019 was a gain of \$16,973 (2018: loss of \$Nil).

Because the Bank holds no Canadian dollar denominated investment securities, there would have been no impact on equity, if the Eastern Caribbean dollar had weakened/strengthened against the Canadian dollar at June 30, 2019.

##### **4.2.3 Interest rate risk**

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the fair value of a financial instrument will fluctuate because of changes in market interest rates. The Bank takes on exposure to the effects of fluctuations in the prevailing level of market interest rates on both its fair value and cash flow risks. Interest margins may increase or decrease as a result of such changes. The Board sets limits on the level of mismatch of interest rate re-pricing that may be undertaken, which is monitored by the Assets and Liabilities Management Committee. Several other committees are involved in the management of interest rate risk which includes the internal management investment committee, investment committee and risk management committees which meets and reports to the Board on a regular basis.

The following table summarises the Bank's exposure to interest rate risks. It includes the Bank's financial instruments at carrying amounts, categorised by the earlier of contractual re-pricing or maturity dates.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

### 4 Financial risk management (continued)

#### 4.2 Market risk (continued)

##### 4.2.3 Interest rate risk (continued)

Because of the limited volatility in the securities markets in which the Bank's investments are held, the Bank is not unduly exposed to fair value interest rate risk.

Cash flow interest rate risk arises from loans and advances to customers, and other interest bearing assets at variable rates. If at June 30, 2019, variable interest rates on loans and advances to customers and other interest bearing assets had been 0.5% higher/lower, with all other variables held constant, post-tax profit for the year would have been \$1,450,379 higher/lower (2018: \$1,121,314), mainly as a result of higher/lower interest income. Cash flow interest rate risk also arises from customers' deposits, at variable interest rates. If at June 30, 2019 variable interest rates on customers' deposits had been 0.5% higher/lower, with all other variables held constant, net profit for the year would have been \$1,309,690 (2018: \$1,176,336) lower/higher, mainly as a result of higher/lower interest expense.

#### 4.3 Liquidity risk

Liquidity risk is the risk that the Bank is unable to meet its obligations when they fall due as a result of customer deposits being withdrawn, cash requirements from contractual commitments, or other cash outflows, such as debt maturities. Such outflows would deplete available cash resources for client lending, trading activities and investments. In extreme circumstances, lack of liquidity could result in reductions in the consolidated statement of financial position and sales of assets, or potentially an inability to fulfil lending commitments. The risk that the Bank will be unable to do so is inherent in all banking operations and can be affected by a range of institution-specific and market-wide events including, but not limited to, credit events, merger and acquisition activity, systemic shocks and natural disasters.

##### 4.3.1 Liquidity risk management process

The Bank's liquidity management process is carried out within the Bank by the Accounting and Investment Department, and monitored by management. Oversight includes the following:

- Day-to-day funding, managed by monitoring future cash flows to ensure that requirements can be met. This includes replenishment of funds as they mature or are borrowed by customers;
- Monitoring liquidity ratios of the consolidated statement of financial position against internal and regulatory requirements; and
- Managing the concentration and profile of debt maturities.

Monitoring and reporting take the form of cash flow measurement, and projections for the next day, week and month respectively, as these are key periods for liquidity management. The starting point for these projections is an analysis of the contractual maturity of the financial liabilities and the expected collection date of the financial assets.

The Accounting and Investment Department also monitors unmatched medium term assets, the level and type of undrawn lending commitments, the usage of overdraft facilities and the impact of contingent liabilities such as standby letters of credit and guarantees.

##### 4.3.2 Funding approach

Sources of liquidity are regularly reviewed by management and the Board of Directors and primarily consist of deposits from customers, share capital and lines of credit with other financial institutions.

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.3 Liquidity risk (continued)

##### 4.3.3 Non derivative cash flows

The table below presents the cash flows payable by the Bank under non-derivative financial liabilities by remaining contractual maturities at the date of the consolidated statement of financial position. The amounts disclosed in the table are the contractual and undiscounted cash flows, whereas the Bank manages the inherent liquidity risk based on expected undiscounted cash flows.

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.3 Liquidity risk (continued)

##### 4.3.4 Assets held for managing liquidity risk

The Bank holds a diversified portfolio of cash and high-quality highly-liquid securities to support payment obligations and contingent funding in a stressed market environment. The Bank's assets held for managing liquidity risk comprise:

- Loans and advances;
- Cash and balances with central banks;
- Certificates of deposit; and
- Government bonds and other securities that are readily acceptable in repurchase agreements with central banks.

##### 4.3.5 Off statement of financial position items

###### (a) Loan commitments

The dates of the contractual amounts of the Bank's off statement of financial position financial instruments that commit to extend credit to customers and other facilities are summarised in the table below.

|                            | Up to 1 year<br>\$ | 1 to 5 years<br>\$ | Total<br>\$       |

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

---

### 4 Financial risk management (continued)

#### 4.4 Fair value of financial assets and liabilities (continued)

(a) *The table above summarises the carrying amounts and fair values of the Bank's financial assets and liabilities (continued)*

*(i) Due from other banks*

Due from other banks includes inter-bank placements and items in the course of collection. It is assumed that the fair value of this category of financial assets is a reasonable estimate of the fair value due to the relatively short term maturities.

*(ii) Loans and advances to customers*

Loans and advances are net of provisions for impairment. The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine their fair value.

*(iii) Investment securities*

Investment securities include assets classified as FVTOCI, which are measured at fair value based on quoted market prices. For FVTOCI investment securities for which no active market exists, the fair value is estimated using the adjusted net asset method valuation technique outlined in section 3.4.2.1 b. Loans and receivables are carried at amortised cost using the effective interest rate method.

*(iv) Due to other banks and customers, other depositors and other borrowings*

The estimated value of deposits with no stated maturity, which includes non-interest bearing deposits, is the amount repayable on demand. The fair value of fixed-interest bearing deposits and other borrowings is assumed to approximate the carrying values.

*(v) Loans payable*

The fair value of the loan payable is estimated to approximate the carrying value.

#### 4.4.1 Fair value hierarchy

IFRS 7 specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources; unobservable inputs reflect the Bank's market assumptions. These two types of inputs have created the following fair value hierarchy:

- Level 1 – Quoted prices in active markets for identical assets or liabilities. This level includes debt instruments listed on exchanges.
- Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3 – Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs). This level includes equity investments and debt instruments with significant unobservable components.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 4 Financial risk management (continued)

#### 4.4. Fair value of financial assets and liabilities (continued)

##### 4.4.1 Fair value hierarchy (continued)

The standard requires the use of observable market data when available. The Bank considers relevant and observable market prices in its valuations where possible.

#### 4.5 Capital management

The Bank's objectives when managing capital, which is a broader concept than the 'equity' on the face of the consolidated statement of financial position, are:

- To comply with the capital requirements set by the Eastern Caribbean Central Bank (the ECCB);
- To safeguard the Bank's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and
- To maintain a strong capital base to support the development of its business.

Capital adequacy and the use of regulatory capital are monitored daily by the Bank's management, employing techniques based on the guidelines developed by the Basel Committee and the European Community Directives, as implemented by the ECCB, for supervisory purposes. The required information is filed with the ECCB on a quarterly basis.

The Banking Act No.1 of 2015 ("the Act") which regulates the Bank's activities came into effect on May 20, 2016. The Act has increased the minimum paid up capital from \$5 million to \$20 million, with an allowance of 450 days from the effective implementation date to achieve compliance. The Bank's paid up capital at June 30, 2019 is \$13,817,584. As part of the strategy to ensure compliance with the Act, the Board of Directors sought and received approval from the Bank's shareholders to raise additional share capital via a right issue, and immediately thereafter, an additional public offering ("APO"). The rights issue was held during the period February 1, 2017 to April 18, 2017 and the paid up capital raised was \$4,486,258.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

### **3 Financial risk management (continued)**

#### **4.5 Capital management (continued)**

The APO commenced on May 15, 2017 and was completed on July 28, 2017 and additional paid up capital of \$10,522,359 was raised. As at June 30, 2019 the Bank has paid up capital of \$24,339,943 which exceeds the minimum paid up capital requirement of EC\$20 million. This additional paid up capital was raised within the required time established of August 13, 2017.

The Act further states that a licensed financial holding company is required to maintain paid up capital of at least \$60,000,000. The Bank of Nevis Limited based on definition provided by the Act is deemed to be a holding company due to its ownership interest in its subsidiary Bank of Nevis International Limited. The Bank of Nevis Limited is in the process of disposing its interest in Bank of Nevis International Limited. Approval for disposal of the interest was granted by the Regulator of The Bank of Nevis Limited on December 8, 2016 on the condition that approval was granted by the Regulator of Bank of Nevis International Limited. Approval from the Regulator of Bank of Nevis International Limited to transfer its majority shares to the external investor in the subsidiary was received on July 28, 2017. It is expected that the sale will be concluded on or before June 30, 2020.

The Nevis International Banking Ordinance 2014, No.1 of 2014 ("NIBO 2014") which governs the operations of the subsidiary Bank of Nevis International Limited ("BONI") came into effect on August 1, 2014. NIBO 2014 repealed the Nevis Offshore Banking Ordinance Cap. 7:05. Section 11(1) (b) of 1996. NIBO 2014 stipulates that a licensee shall maintain not less than US\$2,000,000 (EC\$5,400,000) in fully paid up capital. At June 30, 2019, the Bank held fully paid up capital of \$2,226,428.

The Bank's regulatory capital as managed by the Board of Directors is divided into two tiers:

- Tier 1 capital: share capital (net of any book values of treasury shares), retained earnings and reserves created by appropriations of retained earnings.
- Tier 2 capital: qualifying subordinated loan capital, collective impairment allowances and unrealised gains arising on the fair valuation of securities held as available-for-sale.

The risk weighted assets are measured by means of a hierarchy of five risk weights classified according to the nature of and reflecting an estimate of credit, market and other risks associated with each asset and counterparty, taking into account any eligible collateral or guarantees. A similar treatment is adopted for off balance sheet exposure, with some adjustments to reflect the more contingent nature of the potential losses.

### 5 Critical accounting estimates, and judgements in applying accounting policies and key sources of estimation uncertainty

The Bank's consolidated financial statements and its financial result are influenced by accounting policies, assumptions, estimates and management judgement, which necessarily have to be made in the course of preparation of the consolidated financial statements.

The Bank makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. All estimates and assumptions required in conformity with IFRS are best estimates undertaken in accordance with the applicable standard. Estimates and judgements are evaluated on a continuous basis, and are based on past experience and other factors, including expectations with regard to future events.

Certain accounting policies and management's judgements are especially critical for the Bank's results and financial situation due to their materiality.

#### Measurement of the expected credit loss allowance

The measurement of the expected credit loss allowance for debt security measured at amortised cost and FVTOCI is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour (e.g. the likelihood of customers defaulting and the resulting losses). Explanation of the inputs, assumptions and estimation techniques used in measuring ECL is detailed in note 3.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

### **5 Critical accounting estimates, and judgements in applying accounting policies and key sources of estimation uncertainty (continued)**

A number of significant judgements are also required in applying the accounting requirements for measuring ECL, such as:

- The Bank's criteria for determining if there has been a significant increase in credit risk and so impairment allowances for financial assets should be measured on a LTECL basis
- Choosing appropriate models and assumptions for the measurement of ECL
- Determination of associations between macroeconomic scenarios and, economic inputs, such as unemployment levels and collateral values, and the effect on PDs, EADs and LGDs
- Establishing the number and relative weightings of forward-looking macroeconomic scenarios for each type of product or market and the associated ECL; and
- Establishing groups of similar financial assets for the purposes of measuring ECL.

### **6 Business segments**

The Bank has three operating segments:

- Retail and Corporate banking – incorporating private banking services, customer current accounts, savings, deposits, consumer loans and mortgages and other credit facilities, overdrafts, debit cards;
- International Banking – incorporating private banking services, customer current accounts, savings, deposits, consumer loans and mortgages and other credit facilities, overdrafts to non-residents of Nevis; and
- Mutual Funds – Open-ended public mutual funds.

The mutual funds segment is not a significant operation. As detailed in note 30, the Bank is in the process of disposing of its majority interest in its wholly-owned subsidiary, which operates the international banking segment. The results of this segment is presented in the consolidated statement of comprehensive income as net profit from discontinued operations with supporting note 31. The assets and liabilities are presented in the consolidated statement of financial position as assets and liabilities of subsidiary classified as held for sale. Consequently, separate business segment disclosures have not been presented.

| ACH reserve with the ECCB   | 5,000,000         | 1,816,323  |
| Restricted fixed deposits   | 808,470           | 808,470    |
| Fixed deposits  | 12,013,716        | 8,163,495  |
|   | <b>94,831,000</b> | 78,570,411 |
| Expected credit losses  | (44,199)          | -          |
| Interest receivable   | -                 | 216,271    |
|   | <b>94,786,801</b> | 78,786,682 |
| Current   | <b>57,072,026</b> | 48,126,368 |
| Non-current   | <b>37,714,775</b> | 30,660,314 |
|   | <b>94,786,801</b> | 78,786,682 |

The interest rates on balances due from banks and other financial institutions range from 0% to 4.25% per annum (2018: 0.0% to 4.25% per annum).

Interest receivable has been incorporated in the respective asset balance in the 2019 financial year, however it was presented separately in the 2018 financial year.

Under the Banking Act, commercial banks are required to transfer to the ECCB balances on accounts which are inactive for a period of over 15 years. The balances transferred to the ECCB are held in a special account and are not available for use in the Bank's day-to-day operations.

Commercial banks doing banking business in the Eastern Caribbean Currency Union (ECCU) are required to maintain a mandatory non-interest bearing reserve deposit with the ECCB, which when combined with the EC dollar cash on hand should be equivalent to a minimum 6% of their total deposit liabilities (excluding inter-bank deposits). This reserve deposit relates only to The Bank of Nevis Limited (non-consolidated), and is not available for use in its day-to-day operations. At June 30, 2019 the minimum required amount was \$20,790,000.

The restricted fixed deposits comprise deposits held with Caribbean Credit Card Corporation Limited of \$808,470 (2018: \$808,470) bearing interest of 2% (2018: 2%) per annum. These deposits are not available for use in the Bank's day-to-day operations and are used as security deposits primarily for the credit card operations.

The Bank has deposits held with the ECCB as a reserve requirement for the Eastern Caribbean Automated Clearing House ("ECACH"). The ECACH requires participating banks to maintain collateral equivalent to three days exposure to cheque settlements.

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

---

### **7 Cash and balances due from banks and other financial institutions (continued)**

#### **Fixed deposit held with TCI Bank Limited**

The Bank holds a fixed deposit with TCI Bank Limited, incorporated and operating in the Turks and Caicos Islands, in the amount of \$2,411,378 (originally \$3,014,221).

On April 09, 2010, by petition of the Financial Services Commission (FSC) in the Turks and Caicos Islands to the Supreme Court, TCI Bank Limited was placed in liquidation and joint liquidators were appointed. After consideration of the foregoing, and also considering the present value of future cash flows to be derived from the fixed deposit during a liquidation process based on varying scenarios, Management determined that a prudent approach should be adopted, and an impairment provision of 53% of the value of the fixed deposit (amounting to \$1,597,537) was recorded in the financial statements at June 30, 2010.

Three dividend distribution payments were received subsequent to April 09, 2010. The most recent was on March 28, 2019 when a third interim distribution payment, in the amount of \$453,611 was received by the Bank. This distribution reduced the carrying value of the fixed deposit to nil.

Having reviewed the reports of the liquidators, and considering the payment made by the liquidators, Management has determined that the impairment provision of \$502,772 should be maintained in the non-consolidated financial statements at June 30, 2019. On adoption of IFRS 9 the provision for impairment is recognised as a stage 3 ECL allowance.

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 8 Investment securities (continued)

#### Allowance for impairment on investment securities

The movement in allowance for impairment on investment securities is as follows:

|   | 2019               | 2018      |
|---|--------------------|-----------|
|   | \$                 | \$        |
| <b>Balance, beginning of year</b>               | <b>1,347,450</b>   | 1,347,450 |
| Recovery for the year                           | <b>(19,085)</b>    | -         |
| Re-measurement of ECL allowance on July 1, 2018 | <b>109,633</b>     | -         |
| Write offs                                      | <b>(1,347,450)</b> | -         |
|   | <b>90,548</b>      | 1,347,450 |

#### Treasury bills

Included in the amounts for treasury bills are treasury bills issued by the Government of St. Christopher and Nevis in the amount of \$8,749,920 (2018: \$8,749,920) earning interest at 4% per annum (2018: 4.0% per annum).

Also included in the amounts for treasury bills are treasury bills issued by The Nevis Island Administration in the amount of \$26,995,379 (2018: \$25,633,709) earning interest from 4.5% per annum to 7.0% per annum (2018: 5.5% per annum to 7.0% per annum).

#### Equity investment in TCI Bank Limited

The Bank holds an equity investment in TCI Bank Limited in the amount of \$1,347,450 (2018: \$1,347,450).

On April 09, 2010, by petition of the Financial Services Commission (FSC) in the Turks and Caicos Islands to the Supreme Court, TCI Bank Limited was placed in liquidation and joint liquidators were appointed. After consideration of the foregoing, and other details available at that time, a provision for impairment of 100% of the value of the share capital in TCI Bank Limited in the amount of \$1,347,450 was made in the financial statements as at June 30, 2010. On adoption of IFRS 9 the provision previously established has been written off against the asset.

The movement in investment securities, (2018 excluding interest receivable) may be summarised as follows:

|                                     | Amortised         |                  |                   | Total             |

|   | <b>261,031,476</b> | 242,895,910 |

|  | 2019<br>\$         | 2018<br>\$ |
|--|--------------------|------------|
| <b>Allowance for loan impairment</b>                                       |                    |            |
| The movement in allowance for loans and advances impairment is as follows: |                    |            |
| <b>Balance, beginning of year</b>  | <b>6,060,583</b>   | 5,076,179  |
| Expected credit losses   | <b>1,186,395</b>   | 1,418,676  |
| Re-measurement ECL Allowance on July 1, 2018                               | <b>(1,094,389)</b> | (434,272)  |
| Balance, end of year   | <b>6,152,589</b>   | 6,060,583  |

According to the Eastern Caribbean Central Bank loan provisioning guidelines, the calculated allowance for loan impairment amounts to \$7,736,853 (2018: \$7,216,121). The additional reserves of \$1,584,201 (2018: \$1,155,538) is recognised through a reserve loan impairment (see Note 19). Bad debt written off directly to profit and loss amounted to \$335,728.

The total value of non-productive loans and advances at the end of the year amounted to \$34,859,418 (2018: \$31,461,612). The interest accrued on non-productive loans and advances but not recorded in these financial statements is \$11,942,318 (2018: \$11,958,170). Included in loans and advances is an amount due from other financial institutions of \$12,938,440 (2018: \$10,753,825).

According to the Eastern Caribbean Central Bank loan provisioning guidelines, the calculated allowance for loan impairment amounts to \$7,736,833 (2018: \$7,216,121). The additional reserve of \$1,584,201 (2018: \$1,155,538) is recognised through a reserve for loan impairment (see note 19).

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 11 Property, plant and equipment (continued)

The land and buildings were revalued in March 2019 by an independent property appraiser. The valuation was based on the current replacement cost method based on the values and market conditions at the time of the valuation. The Bank has determined that there have been no significant changes in the market conditions since the valuation, and therefore considers the revalued amounts as being a reasonable assessment of the fair values at reporting date.

The fair value hierarchy for land and buildings is assessed at Level 2, which includes direct and indirect observable inputs.

The following is the carrying amount of land and buildings carried at revalued amounts had they been measured at historical cost:

|                          | <b>Land and<br/>Buildings</b> | <b>Total</b>      |
|--------------------------|-------------------------------|-------------------|
|                          | \$                            | \$                |

## Notes to Consolidated Financial Statements

### For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

#### 15 Taxation

The deferred income tax asset and liability on the consolidated statement of financial position are related to the following:

|  | <b>2019</b>        | <b>2018</b> |
|--|--------------------|-------------|
|  | \$                 | \$          |
| Property, plant and equipment            | <b>(996,690)</b>   | (776,514)   |
| Available-for-sale investment securities | <b>(336,364)</b>   | (13,015)    |
|  | <b>(1,333,054)</b> | (789,529)   |
| Deferred tax liability                   | <b>(1,333,054)</b> | (789,529)   |
| Interest on non-performing loans         | <b>543,591</b>     | 581,052     |
| Deferred income tax (liability) / asset  | <b>(789,463)</b>   | (208,477)   |

The deferred tax expense in the consolidated statement of income is comprised of the following:

|   | <b>2019</b>    | <b>2018</b> |
|---|----------------|-------------|
|   | \$             | \$          |
| Deferred tax on depreciation of property, plant and equipment | <b>220,176</b> | (172,295)   |
| Deferred tax on tax losses                                    | -              | 248,097     |
| Interest on non-performing loans                              | <b>37,460</b>  | 627,068     |
| Deferred income tax expense                                   | <b>257,636</b> | 702,870     |

The deferred tax income recognised in other comprehensive income and on adoption of IFRS 9 is composed of the following:

|   | <b>2019</b>      | <b>2018</b> |
|---|------------------|-------------|
|   | \$               | \$          |
| Deferred tax on movement in market value of available-for-sale- investment securities | <b>(323,349)</b> | (69,404)    |
| Deferred tax on share issue transaction cost  | -                | 9,005       |
|   | <b>(323,349)</b> | (60,399)    |

#### **Income tax receivable / (payable)**

|   |                  |             |
|---|------------------|-------------|
| Income tax payable net, beginning of year | <b>53,605</b>    | (1,738,535) |
| Payments made during year, net of refunds | <b>1,185,081</b> | 681,083     |
| Current tax expense                       | <b>(258,924)</b> | (1,927,091) |
| Prior year tax expense over-accrual       | <b>(313,276)</b> | 542,536     |
| Tax credit                                | -                | 2,495,612   |
| Income tax receivable at end of year      | <b>666,486</b>   | 53,605      |

#### Tax Losses

The Bank has carried forward income tax losses of \$Nil (2018: \$Nil). The tax losses have not been confirmed by the tax authorities. Losses may be carried forward and deducted against future taxable income within five years following the year which the losses were incurred. Losses are restricted to 50% of the taxable income in any one year.

#### Capital cost allowances

The additions and claims for capital cost allowances during the current year have not been confirmed by the tax authorities. Unclaimed capital cost allowances may be carried forward indefinitely and deducted against future taxable income. The amount claimed is restricted to 50% of the taxable income in any one year.

*(expressed in Eastern Caribbean dollars)*

---

#### **15 Taxation (continued)**

In April 2012 the Income Tax Act (ITA) was amended to include a specific provision to restrict the claiming of expenses used to generate exempt income without defining what it considered to be exempt income. Subsequently, during the financial year ended June 30, 2016, the Bank of Nevis Limited received assessments from the tax authorities for the financial years ended June 30, 2012, 2013 and 2014, claiming additional taxes as a result of the disallowance of expenses used to generate exempt income. These assessments were subsequently settled during the financial year ended June 30, 2016. However, the Bank reserved the right to object to the tax authority's interpretation provisions of the ITA and the terms of the Public Sector tax free loans for all subsequent periods.

In June 2017, the Bank resubmitted revised tax returns for income years 2015, 2016 and 2017 on the basis of (1) its understanding of the terms agreed with Government in relation to the Public Sector tax free loans, (2) its interpretation of what income should be classified as exempt income and (3) using what the Bank determined to be a fair and equitable formula to compute expenses to be disallowed on the basis that they were incurred to generate exempt income.

After discussions with the tax authorities in relation to the treatment of the Public Sector tax free loans, the classification of exempt income and an equitable formula to compute expense used to make exempt income, the Bank met with the tax authorities in August 2018 to discuss and settle the issues. On October 5, 2018 written communication was received from the tax authorities confirming that the interest foregone on the eligible facilities or Public Sector tax free loans would be treated as an advance tax payment. Subsequently, on October 30, 2018 the Bank received tax assessments from the tax authorities for income years 2015 to 2017 with an overall tax liability of \$654,917, however the basis for the assessment was not in accordance with the agreed treatment of interest income foregone on Public Sector loans as an advance tax payment to the Government. Therefore, the tax assessments for 2015, 2016 and 2017 were still in dispute and the Bank filed objections with the tax authorities on the basis that the assessments issued were not in accordance with the agreed position that the interest foregone on the restructured Public sector loans were in fact an advance tax payment and that the formula used to disallow expenses used to generate exempt income was not fair or equitable.

During the 2019 financial year The Bank of Nevis Limited and the tax authorities continued discussions on the tax objections and it was agreed by the tax authority that interest income on Public Sector tax free loans are free from tax and should not be included as part of the formula for restricted expense when calculating disallowed expenses relating to exempt income. The Bank of Nevis Limited conceded to the overall formula used by the tax authorities to calculate disallowed expenses related to exempt income on the basis that the calculation is applied consistently to other financial institutions in the Federation of St. Kitts and Nevis and that the methodology used is widely accepted throughout the Caribbean region. The final tax liability for the 2015-2017 financial years was \$313,276.

## Notes to Consolidated Financial Statements

### For the year ended June 30, 2019

*(expressed in Eastern Caribbean dollars)*

#### 16 Share capital

Authorised share capital - 50,000,000 shares (2018: 50,000,000 shares) at no par value.

Issued and fully paid – 18,096,644 shares (2018: 18,096,644 shares) at no par value.

The Company's Ordinance, Nevis 1999 (section 26) stipulates that shares in a company are to be without nominal or par value. The Ordinance further stipulates that where a former-Act company is continued under the Ordinance, a share with nominal or par value issued by the company before it was continued is deemed to be a share without nominal or par value. The Bank continued under the Companies Ordinance of Nevis on December 31, 2001 and would have adopted the no par value requirement as prescribed by the Ordinance. The par value prior to continuance under the Companies Ordinance was EC\$1.00.

The movement in share capital is summarised as follows:

|  | <b>Number<br/>of Shares</b> | <b>Share<br/>Capital<br/>\$</b> |
|--|-----------------------------|---------------------------------|
| Balance as at June 30, 2017                | <b>13,833,945</b>           | 13,817,584                      |
| Issue of shares (net of transaction costs) | <b>4,262,699</b>            | 10,522,359                      |
| <b>Balance as at June 30, 2018</b>         | <b>18,096,644</b>           | 24,339,943                      |
| Issue of shares (net of transaction costs) | -                           | -                               |
| <b>Balance as at June 30, 2019</b>         | <b>18,096,644</b>           | 24,339,943                      |

The Banking Act No. 1 of 2015 ("the Act") which regulates the activities of the Parent Company ("BON") came into effect on May 20, 2016. The Act has increased the minimum capital requirement for licensees from \$5 million to \$20 million, with an allowance of 450 days from the Act's effective date to achieve compliance. The Bank's paid up capital at June 30, 2017 was \$13,817,584. As part of the strategy to ensure compliance with the Act, the Board of Directors of BON sought and received approval from its shareholders to raise additional share capital via a rights issue and immediately thereafter, an additional public offering ("APO").

The rights issue was held during the period February 1, 2017 to April 18, 2017 and the paid up capital raised was \$4,486,258. The APO commenced on May 15, 2017 and was completed on July 28, 2017 and \$10,522,359 was raised. As June 30, 2019, The Company has paid up capital of \$34,339,943 which exceeds to the minimum paid up capital requirement of \$20 million for a licensed financial institution.

The Act further states that a holding Company is required to have paid up capital of \$60,000,000. The Bank of Nevis Limited based on the definition provided by the Act is deemed to be a holding Company due to its ownership interest in its subsidiary Bank of Nevis International Limited. The Bank of Nevis Limited is in the process of disposing a majority interest in Bank of Nevis International Limited. Approval for disposal of the interest was granted by the Regulator of The Bank of Nevis Limited on December 8, 2016 on the condition that approval was granted by the Regulator of Bank of Nevis International Limited. Approval from the Regulator of Bank of Nevis International Limited to transfer its majority shares to the external investor in the subsidiary was received on July 28, 2017. It is expected that the sale will be concluded on or before June 30, 2020.

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 17 Statutory reserves

Section 45 (1) of the St. Christopher and Nevis Banking Act No. 1 of 2015 provides that not less than 20% of each year's net earnings shall be set aside to a reserve fund whenever the fund is less than the paid-up capital of the Bank.

Section 12 (1) of the Nevis International Banking Ordinance 2014 provides that the Bank is to maintain a reserve fund and shall out of its net profits of each year and before any dividend is paid, transfer to the said fund a sum equal to not less than 25% of those profits whenever the amount of the reserve fund is less than the paid-up capital of the Bank.

There was a transfer \$1,735,473 of the statutory reserves for the year ended June 30, 2019 and \$2,958,423 for the year ended June 30, 2018.

### 18 Revaluation reserves

|  | 2019              | 2018              |
|--|-------------------|-------------------|
|  | \$                | \$                |
| The revaluation reserves are comprised of the following: |                   |                   |
| Continuing Operations                                    |                   |                   |
| FVTPL and FVTOCI securities                              | 970,875           |                   |
| Available-for-sale investment securities                 | -                 | 199,785           |
| Property   | 13,862,130        | 12,803,827        |
|  | <u>14,833,005</u> | <u>13,003,612</u> |
| Discontinued Operations                                  |                   |                   |
| Available-for-sale investment securities                 | 563,768           | (669,624)         |

This reserve is unrealised and hence not available for distribution to shareholders. The deferred tax impact on the appreciation/ (depreciation) in market values of investment securities is shown below:

|   | 2019           | 2018          |
|---|----------------|---------------|
|   | \$             | \$            |
| Appreciation/(depreciation) in market value | 661,068        | (34,197)      |
| Less: deferred tax                          | 323,349        | 69,404        |
|   | <u>337,719</u> | <u>35,207</u> |

### 19 Other reserves

## Notes to Consolidated Financial Statements

### For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

#### 23 Related party transactions

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

A number of banking transactions were entered into with related parties. These include loans, deposits and other transactions. The details of related party transactions, outstanding balances at the year end and relating expenses and income for the year are as follows:

##### Directors key management personnel, and related entities

|  | 2019<br>\$   | 2018<br>\$   |
|--|--------------|--------------|
| <b>Balances at June 30, 2019</b>                     |              |              |
| Loans and advances outstanding                       | 2,168,614    | 2,047,088    |
| Undrawn credit commitments                           | -            | -            |
| Collateral held on balances outstanding              | 4,515,675    | 21,541,881   |
| Deposits held  | 35,585,523   | 37,332,753   |
| <b>Transactions for the year ended June 30, 2019</b> |              |              |
| Interest income earned on loans and advances         | 147,514      | 312,059      |
| Interest expense incurred on deposits held           | 1,114,967    | 1,987,669    |
| Interest rates on loans and advances                 | 5.0% - 19.5% | 5.0% - 19.5% |
| Interest rates on deposits held                      | 0.0% - 4.00% | 0.0% - 4.0%  |

Loans and advances to directors are granted on commercial terms and are secured by cash and/or mortgages over real estate.

Loans and advances to key management personnel are granted on terms outlined in the Bank's Staff Advances Policy, which provides for the application of certain preferential terms, including interest rates and collateral arrangements. Collateral arrangements for loans and advances to key management personnel include cash and/or mortgages over properties.

During the year, salaries and related benefits of \$1,839,418 (2018: \$1,873,019) were paid to key members of management and were allocated as follows:

|                                      | 2019<br>\$       | 2018<br>\$       |
|--------------------------------------|------------------|------------------|
| Salaries and short term benefits     | 1,770,158        | 1,797,161        |
| Pension and post-employment benefits | 69,260           | 75,858           |
|                                      | <b>1,839,418</b> | <b>1,873,019</b> |

#### 24 Earnings per share

##### Basic earnings per share from continuing and discontinued operations

This is calculated by dividing the net profit attributable to shareholders by the weighted average number of ordinary shares in issue during the year as follows.

|   | 2019<br>\$  | 2018<br>\$  |
|---|-------------|-------------|
| Net profit attributable to shareholders             | 4,584,842   | 8,278,542   |
| Weighted average number of ordinary shares in issue | 18,096,644  | 17,688,068  |
|   | <b>0.25</b> | <b>0.47</b> |

# The Bank of Nevis Limited

## Notes to Consolidated Financial Statements

For the year ended June 30, 2019

(expressed in Eastern Caribbean dollars)

### 24 Earnings per share (continued)

#### Basic earnings per share from continuing operations

This is calculated by dividing the net profit from continuing operations attributable to shareholders by the weighted average number of ordinary shares in issue during the year as follows:

|  | <b>2019</b>       | <b>2018</b> |
|--|-------------------|-------------|
|  | \$                | \$          |
| Net profit from continuing operations attributable to shareholders | <b>18,637</b>     | 2,160,106   |
| Weighted average number of ordinary shares in issue                | <b>18,096,644</b> | 17,688,068  |
|  | <b>0.00</b>       | 0.12        |

### 25 Contingencies and commitments

#### Credit related and capital commitments

The following table indicates the contractual amounts of the Banks' off statement of financial position financial instruments:

|  | <b>2019</b>       | <b>2018</b> |
|--|-------------------|-------------|
|  | \$                | \$          |
| Undrawn commitments to extend advances | <b>17,656,688</b> | 21,324,588  |

Included in the amount of undrawn commitments to extend advances above are credit card commitments totalling \$5,318,984 (2018: \$5,096,679) at the year end.

### 26 Dividends

During the year, a cash dividend of \$0.20 per share (2018: \$0.15 per share) amounting to \$3,619,329 was paid (2018: \$2,714,708).

### 27 Cash and cash equivalents

### 30 Disposal group held for sale

During a special meeting held on February 18, 2016, the shareholders of the Bank of Nevis Limited ("BON") resolved that the Directors of BON be authorised to dispose of BON's majority interest in its wholly owned subsidiary Bank of Nevis International Limited ("BONI") by way of the sale of the majority or full (100%) shareholding in BONI, such authority being granted up to September 30<sup>th</sup>, 2016 failing which, the Directors of BON be authorised to proceed with a spin-off whereby each shareholder of BON will be allotted an interest in BONI proportionate to their existing shareholding.

Following the passing of the aforementioned resolution and the establishment of the criteria and process for selecting a potential investor, the Directors of BON received and considered several inquiries and offers from external parties in relation thereto and entered into a Memorandum of Understanding for the sale of Majority Shareholding in BONI ("MOU") with one of the aforementioned parties.

The sale and purchase agreement was executed between the parties to the MOU on September 30, 2016. The sale of BON's majority interest (60%) in BONI has been approved by the regulatory authorities.

On January 23, 2017 the Board of Bank of Nevis International Limited approved the increase of its authorised ordinary share capital from 200,000 to 1,000,000. Based on approval of the shareholder, The Bank of Nevis Limited, a 5:1 bonus issue of EC\$10.00 per share was executed.

### 30 Disposal group held for sale (continued)

At an Extraordinary General Meeting of The Bank of Nevis Limited (‘the Bank’) held on Wednesday 20th December, 2017, the shareholders of the Bank resolved that the Directors be authorised to dispose of the Company’s interest in Bank of Nevis International Limited (BONI) by way of the sale of an additional 15% shares in BONI with authorization to dispose of the remaining shareholdings in BONI, such authority being granted up to 31st December, 2018.

On 26th November 2018, the Bank entered into an agreement with Petrodel Investment Advisers (Nevis) Limited for the sale of the remaining 40% shares in BONI with a completion date of 30th June 2019. This was subject to the approval of the Regulator of International Banking. On 9th April 2019, the Regulator confirmed approval for the sale and it is expected that the sale of majority interest in the subsidiary will be completed before June 30, 2020.
