Quarterly Report (Form ECSE - Q)

1 Financial Statements

Unaudited quarterly Financial Statements are attached and include:

- (a) Condensed Balance Sheet as at June 30, 2015 and June 30, 2014.
- (b) Condensed Statement of Income for the nine (9) months ended June 30, 2015 and June 30, 2014.
- (c) Condensed Statement of Cash Flows for the nine (9) months ended June 30, 2015 and June 30, 2014.

2 Management Discussion and Analysis of Financial Condition and Results of Operations

For the nine months ended June 30, 2015 the Bank recorded a Net Profit after tax of \$2.394 million compared to \$3.185 million for the corresponding period last year. Our core profits improved by 12%, when the comparative 2014 results are adjusted for the one-off gain of \$1.052 million related to the sale of VISA shares in that period.

Liquidity in Grenada increased between March 2014 and March 2015, with the loan to deposit ratio of all commercial banks moving from 74.25 percent to 65.73 percent. For the period December 2014 to March 2015 Liquid Assets/Total Deposits plus Total Liabilities increased from 35.52 percent to 38.12 percent. The Bank's liquidity increased with a loan to deposit ratio of 65.33 percent as at June 30, 2015 down from 67.05 percent as at March 31, 2015.

As at June 30, 2015 there was a 2.11% or \$15M (Savings - \$5M; Demand - \$12M and CD's decrease \$2M) increase in the total deposit portfolio compared to March 31, 2015. The Bank's top 20 deposit customers represented 19.9% of total deposits as at June 30, 2015, an increase from 18.9% as at March 31, 2015. As at March, 2015, the Bank's market share for deposits increased slightly to 26.72% compared to 26.62% as at December 2014.

The total loans portfolio remained constant during the quarter to June 30, 2015. The Bank's top 20 borrowers represented 25.8% of total loans as at June 30, 2015 a slight increase from 25.0% as at March 31, 2015. As at March 31, 2015 the Bank's market share for loans increased slightly to 28.06% from 28.03% as at December 31, 2015.

The ratio of the non-performing portfolio to total loans decreased slightly to 9.63% as at June 30, 2015, down from 10.04% as at March 31, 2015. Delinquency deteriorated to 4.0% as at June 23, 2015 from 2.5% as at March 23, 2015.

The Bank's capital base decreased from March 2015 to June 2015. At June 30, 2015, Tier 1 capital to total adjusted risk weighted assets, calculated on the basis of the Basle Committee risk based guidelines implemented by the Eastern Caribbean Central Bank was 13.8 percent and total qualifying capital to total adjusted risk weighted assets was 15.4 percent compared to 14.3 and 15.6 percent respectively as at March 2015. Both ratios far exceed the minimum established by the Basle Committee.

3 Disclosure of Risk Factors

The Bank manages a variety of risks in the ordinary course of business. The major risks associated with its business are credit risk, interest rate risk, market risk, liquidity risk, currency risk and operational risk. The Bank's parent company, Republic Bank Limited, lends its support to the bank in managing these risks.

Credit Risk

Credit Risk is the potential that a borrower or counterparty will fail to meet its stated obligations in accordance with agreed terms. The effective management of credit risk is a key element of a comprehensive approach to risk management and is considered essential to the long term success of the Bank. The Bank's credit risk management process operates on the basis of a hierarchy of discretionary authorities. The Republic Group Risk Management Unit supports the Bank in ensuring that loans and advances are made in accordance with sound banking practice, current legislation and in accordance with the applicable general policy of the Bank as laid down from time to time. The risk management function is kept from and independent of the business development aspect of operations.

The Bank uses a risk rating system which groups commercial/corporate accounts into various risk categories to facilitate the management of risk on both an individual account and portfolio basis. Trend indicators are also used to evaluate risk as improving, static or deteriorating. The evaluation of the risk and trend inform the credit decision and determines the intensity of the monitoring process.

The credit control processes emphasize early detection of deterioration and prompt implementation of remedial action and where it is considered that recovery of the outstanding liability may be doubtful or unduly delayed, such accounts are transferred from performing to non-performing status.

As a prudent policy, loan loss provisions are set aside to cover any potential loss in respect of debts that are not performing satisfactorily. A review of these provisions is conducted quarterly in accordance with laid down guidelines and recommended provisions arising out of these reviews are submitted to the Board for approval.

Interest Rate and Market Risks

Interest rate risk is the exposure of interest bearing assets and liabilities to movements in interest rate. The Asset/Liability Committee reviews on a monthly basis the non-credit and non-operational risks for the Bank. The primary tools currently in use are gap analysis, interest rate sensitivity analysis and exposure limits for both assets and liabilities.

Liquidity Risk

Liquidity risk is defined as the risk of the Bank not having sufficient financial resources available to meet all its obligations and commitments as they fall due, or can access these only at excessive cost. Liquidity management is designed to ensure that funding requirements can be met, including the replacement of existing funds as they mature or are withdrawn, or to satisfy the demands of customers for additional borrowings. A substantial portion of the bank is funded with "core deposits". The Bank has access to the Inter Bank Market within the Eastern Caribbean Currency Union and Republic Group's funding to provide additional liquidity as conditions demand. The Bank can also use its significant investments in regional Government securities for liquidity support. The Bank continually balances the need for short-term assets which have lower yields, with the need for higher asset returns.

Currency Risk

Currency Risk is the exposure of the Bank's financial condition to unfavourable movements in foreign currency exchange rates. In recognition of these risks the Bank has established limits for uncovered holdings in each foreign currency.

Operational Risk

Operational risk is inherent in all business activities and is the potential for financial or reputational loss arising from inadequate or failed internal control, operational processes or the systems that support them. It includes errors, omissions, disasters and deliberate acts such as fraud. The Bank recognizes that such risk can never be entirely eliminated and manages the risk through a combination of systems and procedures to monitor and document transactions. Where appropriate some risk is transferred by the placement of adequate insurance coverage. The Bank has developed contingency arrangements to support operations in the event of disaster.

4 Legal Proceedings

As at June 30, 2015 there were certain legal proceedings outstanding against the Bank. Professional advice indicates that it is unlikely that any significant loss will arise.

5 Changes in Securities and Use of Proceeds

None

6 Defaults Upon Senior Securities
