7. Disclosure about Risk Factors.

Provide a discussion of the risk factors that may have an impact on the results from operations or on the financial conditions. Avoid generalised statements. Typical risk factors include untested products, cash flow and liquidity problems, dependence on a key supplier or customer, management inexperience, nature of business, absence of a trading market (specific to the securities of the reporting issuer), etc. Indicate if any risk factors have increased or decreased in the time interval between the previous and current filing.

The Group's activities expose it to a variety of financial risks, as taking risk is core to the commercial banking and insurance business. Management is aware that operational risks are an inevitable consequence of being in business, and hence risk management policies are designed to identify and analyse risks in order to set appropriate levels and controls to monitor and mitigate risks. Risk management is carried out by the Credit and Comptroller Divisions under policies approved by the Board of Directors. In addition, internal audit is responsible for the independent review of risk management and the control environment.

The types of risks that affect the Group are credit risk, liquidity risk, market risk (interest rate and currency risk), insurance risk and other operational risks. Credit risks can have a great impact on the results from operations or on financial conditions due to the industry in which we operate. The Group takes on exposure to credit risk, which is the risk that counterparties will cause financial losses for the Group by failing to discharge their obligations. Credit exposure arises principally in lending activities that lead to loans and advances and investment activities that bring debt securities and other bills into the Group's asset portfolio. The Group's exposure to credit risk is managed through regular analysis of the ability of its borrowers to meet obligations as well as taking collateral and corporate and personal guarantees as securities on advances.

The Group is exposed to market risk, which is the risk that fair values or future cash flows will fluctuate because of changes in market prices. The Group holds investments in open positions in interest rate and equity products, all of which are exposed to general and specific market movements and changes in market rates or prices such as interest rates, equity prices and foreign exchange rates. Exposure to market risk is managed by diversifying the investment portfolio.

Liquidity risk, to which the Group is also exposed, is the risk that the Group is unable to meet its payment obligations when they fall due and fulfill commitments to lend. Sources of liquidity are regularly monitored and the Group holds a diversified portfolio of cash and investment securities to support payment obligations.

The Group also manages insurance risk, the risk of an insured event occurring, by limiting its exposure to potential loss on insurance policies by ceding certain levels of risk to reinsurers.

10. Management's Discussion and Analysis of Financial Condition and Results of Operation.

Discuss the reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations during the

financial year of the filing. Discussions of liquidity and capital resources may be combined whenever the two topics are interrelated.

The Management's Discussion and Analysis should disclose sufficient information to enable investors to judge:

1. The quality of earnings;
2. The likelihood that past performance is indicative of future performance; and
3. The issuer's general financial condition and outlook.

It should disclose information over and above that which is provided in the management accounts and should not be merely a description of the movements in the financial statements in narrative form or an otherwise uninformative series of technical responses. It should provide management's perspective of the company that enables investors to view the business from the vantage point of management.

The discussion should focus on aspects such as liquidity; capital resources; changes in financial condition; results of operations; material trends and uncertainties and measures taken or to be taken to address unfavourable trends; key performance indicators; and nonfinancial indicators.

General Discussion and Analysis of Financial Condition

There were no unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations. Results from usual and ordinary events and transactions of the Group for the financial year 2015-2016 lead to a report of total income of \$161.2 million and net income after tax of \$28.4 million.

Liquidity and Capital Resources

Provide a narrative explanation of the following (but not limited to):

- i) The reporting issuer's financial condition covering aspects such as liquidity, capital resources, changes in financial condition and results of operations.
- ii) Any known trends, demands, commitments, events or uncertainties that will result in, or that are reasonably likely to result in, the issuer's liquidity increasing or decreasing in any material way. If a deficiency is identified, indicate the course of action that the reporting issuer has taken or proposes to take to remedy the deficiency.

- iii) The issuer's internal and external sources of liquidity and any material unused sources of liquid assets.
- iv) Provisions contained in financial guarantees or commitments, debt or lease agreements or other arrangements that could trigger a requirement for an early payment, additional collateral support, changes in terms, acceleration of maturity, or the creation of an additional financial obligation such as adverse changes in the issuer's financial ratios, earnings, cash flows or stock price or changes in the value of underlying, linked or indexed assets.
- v) Circumstances that could impair the issuer's ability to continue to engage in transactions that have been integral to historical operations or are financially or operationally essential or that could render that activity commercially impracticable such as the inability to maintain a specified level of earnings, earnings per share, financial ratios or collateral.
- vi) Factors specific to the issuer and its markets that the issuer expects will affect its ability to raise short-term and long-term financing, guarantees of debt or other commitment to third parties, and written options on non-financial assets.
- vii) The relevant maturity grouping of assets and liabilities based on the remaining period at the balance sheet date to the contractual maturity date. Commentary should provide information about effective periods and the way the risks associated with different maturity and interest profiles are managed and controlled.
- viii) The issuer's material commitments for capital expenditures as of the end of the latest fiscal period, and indicate the general purposes of such commitments and the anticipated source of funds needed to fulfil such commitments.
- ix) Any known material trends, favorable or unfavorable, in the issuer's capital resources, including any expected material changes in the mix and relative cost of capital resources, considering changes between debt, equity and any off-balance sheet financing arrangements.

LIQUIDITY

The Group's liquidity is managed and monitored on a daily basis by management to ensure that there is sufficient liquidity to meet its liabilities when they fall due, both under normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation. The Group maintains a portfolio of marketable assets that can be easily liquidated as protection against unforeseen liquidity problems, as well as cash and balances with the Central Bank and other financial institutions.

Over the review period, cash and cash equivalents decreased from \$1.186 billion at June 2015 to \$941.0 million at June 2016, which represents a decrease of \$245.0 million or 20.7%. Notwithstanding this decrease, the National Group has substantial liquidity to meet its obligations and for investing in lucrative opportunities.

CAPITAL RESOURCES

The Group's policy is to manage the capital levels based on the underlying risk of its business. Capital adequacy is monitored to ensure compliance with the ECCB's risk based capital guidelines, which require a minimum ratio for Tier 1 or core capital of 4% to risk weighted assets. Tier 1 Capital is comprised of share capital, statutory reserves, general reserves and retained earnings. At June 30, 2016, the Group was in compliance with the capital adequacy requirements, reporting a Tier 1 capital ratio of 29%. At June 30, 2016 Total shareholders' equity was \$467.6 million, a decrease of \$8.2 million (1.7%), compared with \$475.8 million at June 2015.

Off Balance Sheet Arrangements

Provide a narrative explanation of the following (but not limited to):

- i) Disclosures concerning transactions, arrangements and other relationships with unconsolidated entities or other persons that are reasonably likely to materially affect liquidity or the availability of, or requirements for capital resources.
- ii) The extent of the issuer's reliance on off-balance sheet arrangements should be described fully and clearly where those entities provide financing, liquidity, market or credit risk support, or expose the issuer to liability that is not reflected on the face of the financial statements.
- iii) Off-balance sheet arrangements such as their business purposes and activities, their economic substance, the key terms and conditions of any commitments, the initial on-going relationship with the issuer and its affiliates and the potential risk exposures resulting from its contractual or other commitments involving the offbalance sheet arrangements.

- iv) The effects on the issuer's business and financial condition of the entity's termination if it has a finite life or it is reasonably likely that the issuer's arrangements with the entity may be discontinued in the foreseeable future.

At the end of the financial year, June 30 2016, the Bank had contractual commitments to extend credit to customers, guarantee and other facilities, which totaled \$54.1 million.

Results of Operations

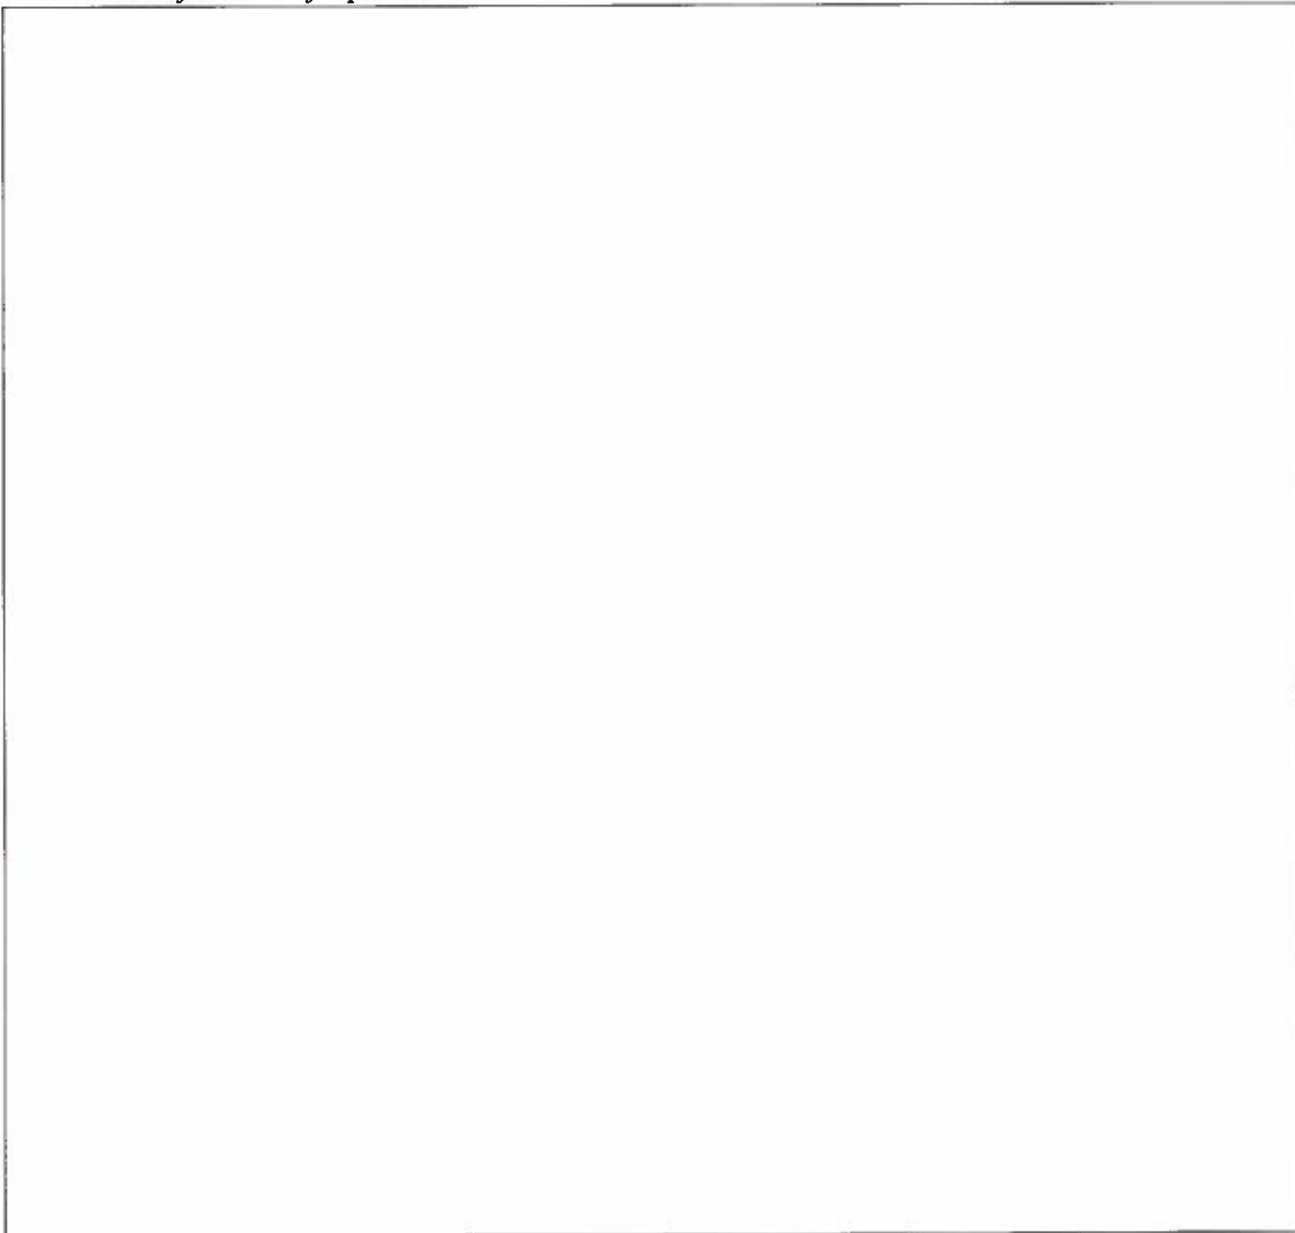

In discussing results of operations, issuers should highlight the company's products and services, facilities and future direction. There should be a discussion of operating considerations and unusual events, which have influenced results for the reporting period. Additionally, any trends or uncertainties that might materially affect operating results in the future should be discussed.

Provide a narrative explanation of the following (but not limited to):

- i) Any unusual or infrequent events or transactions or any significant economic changes that materially affected the amount of reported income from continuing operations and, in each case, the extent to which income was so affected.
- ii) Significant components of revenues or expenses that should, in the company's judgment, be described in order to understand the issuer's results of operations.
- iii) Known trends or uncertainties that have had or that the issuer reasonably expects will have a material favorable or unfavorable impact on net sales or revenues or income from continuing operations.

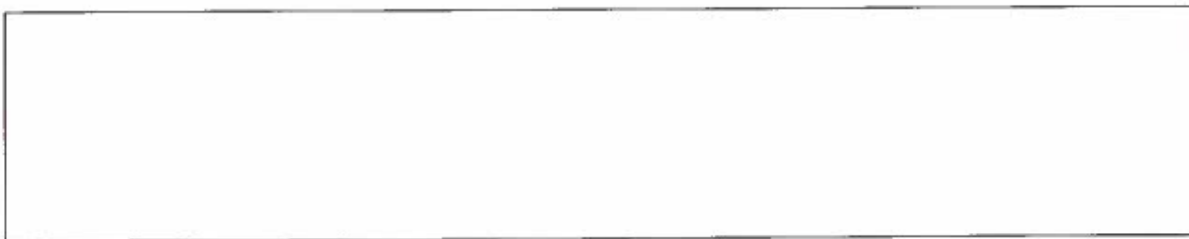

- iv) Known events that will cause a material change in the relationship between costs and revenues (such as price increases, costs of labour or materials), and changes in relationships should be disclosed.
- v) The extent to which material increases in net sales or revenues are attributable to increases in prices or to increases in the volume or amount of goods or services being sold or to the introduction of new products or services.
- vi) Matters that will have an impact on future operations and have not had an impact in the past.
- vii) Matters that have had an impact on reported operations and are not expected to have an impact upon future operations
- viii) Off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships that have or are reasonably likely to have a current or future effect on the registrant's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.
- ix) Performance goals, systems and, controls,
